

circumstances wound up meeting Alex Jones and I learned what everyone who has met him now knows which is Alex

1:55

Jones is not a crazy person Alex Jones has said pretty far out things on TV from time to time not that far out he

2:02

hasn't said men can become women or Ukraine is a democracy but within the bounds of say cable news pretty far out

2:09

but fundamentally Alex Jones is right about a lot of things and in fact that's why they don't like him Alex Jones has

2:16

an uncanny really an amazing ability to predict events before they happen he has

2:22

called it and he's done it on tape again and again to the point where it's a meme on the internet Alex Jones profet not

2:28

conspiracy nut profet but when you dig into Alex Jones's predictions they are so spoton that it's

2:36

remarkable how does he do this we're guessing there's a kind of spiritual sensitivity to Alex Jones maybe that's

2:42

his secret he was displaying this years before the average person this country even thought about matters like that now

2:48

it's pretty obvious to most people that the the current war going on in this country is taking place in ways you

2:54

can't see it most of the time but 10 years ago people are not thinking that way Alex Jones was and so we thought

3:00

it'd be interesting to sit down and talk to Alex Jones the man he joins us now in our studio Alex Jones thank you wow

3:07

Tucker it's great to be here amazing Studios amazing I meaning amazing people and uh this is this is really going to

3:14

be I think a historic interview so thanks for having me well I'm really grateful to be able to do it and and it's just it's one of the great

3:20

blessings of my life and of my job is that I've been able to meet people that I've had preconceptions about and

3:26

sometimes find those preconceptions uh bolstered and in other cases demolished

3:32

and you're definitely in the second category so I want for people who've made it this far you know the people

3:37

around the country have really succeeded in making you disreputable and the whole point of course is people won't listen

3:43

to you so we thought it'd be interesting to start with a series of on tape predictions that you made some of which

3:49

are so precise and so preent that it makes the hair on my arms stand up and I'm being sincere and our viewers are

3:55

about to about to see what I'm talking about here is a list of things that you called ahead of

4:01

time those 911 Clips are crazy I'm actually bothered by the Precision of

4:06

them I'm not accusing you of being behind 911 but how could you in July of

4:13

2001 call that you said they're going to have airliners fly into the World Trade

4:19

Center and they're going to blame a guy come called AMA bant now leaving inside what actually happened what how could

4:26

you have known that well in the longer Clips it's a M hour show from July 25th

4:32

20 2001 I specifically walked through all the reasons and I knew they were hyping

4:40

up that we were about to be hit by AMA Bin Laden I knew that the World Trade Center had been attacked the first time

4:46

and that the feds been involved helping cook the bomb and allowing it to go forward and I just saw a lot of the

4:51

pre-programming that was happening uh in the media which they were on the news saying you know life's about to change

4:58

in America and I was what the rang Corporation was saying and what the Pentagon was putting out and I read the

5:03

PAC document from a year before rebuilding America's defenses that Dick Cheney had helped right and it said we

5:09

need a Pearl Harbor Event on the American Homeland to be able to bring in this police state and and this control

5:16

and then expand the American Empire worldwide so hundreds of pieces of data

5:22

hundreds of pieces of data went into that prodiction but terrorists are going to hit the World Trade Center in July of

5:28

2001 I lived in the United States then that was the last thing on my mind and I

5:33

lived in Washington I know the guys who wrote the PAC document because I shared an office with them so I I was more informed than the average person and

5:40

that was the last thing that crossed my mind in the summer of 2001 like everyone

5:45

else I thought it was a Cessna but how convinced were you that this was going to happen I was completely convinced in

5:52

fact in the full clip of that's online you can find it on Twitter other places it has been removed I explained to

5:57

people that they need to call the White House and and tell the White House we know if you allow of these attacks uh

6:05

that you're basically allowing it to happen and it was similar to all the data we had when I you said that on on

6:11

your show on my show and I gave the number out so people could actually call the White House and and then going back

6:17

to October of last year uh when the uh Russians uh went into Ukraine I

6:23

specifically said I think they'll go in by the end of February and there was a lot of data that went into that and then

6:28

they specifically did go in uh on February 24th and so I was able to make that prediction as well but there was a

6:35

lot of data and information that went into it sure I'm just for the record I miscalculated that completely I didn't think

6:40

they were going to do it you were right I was wrong not for the first time but the 911 thing I remember that really

6:46

well nobody was thinking like that so you called it in public on tape did the

6:52

911 Commission so if I'm the FBI and I'm investigating 911 you're like the first guy I would call because you're the only

6:57

person who said that out loud did they call you no no they didn't but my most

7:02

accurate prediction going back over a decade was when I read the Rockefeller Foundation operation lockstep uh and

7:09

they described using a virus to bring in world government to bring in a world medical ID that they would then build

7:14

the social credit score off of and that they would make people wear masks for fear that they would shut down sporting

7:21

events and things like that and basically phase in this new tyranny so I was also able to specifically um make

7:28

that prediction over over and over and over again because I was going off their own battle plans are you the only person in media

7:35

who actually reads these reports I don't think a lot of people do read them but I do read them I mean I'm currently

7:41

reading MIT reports from their top councils Pentagon reports they have a working group called The Mad Scientist

7:47

group at the Pentagon that works with MIT and if you go watch their hourong two-hour long uh three-hour long

7:55

meetings they have on YouTube uh with all the tops lan we're talking hundreds

8:00

of top scientists they admit that they're building a post-human world that

8:06

soon everyone's going to be mind controlled uh that they're going to put smart dust in our food that they can

8:11

electromagnetically control and and they just lay it all out right there and I've learned what these people said in the

8:17

50s they would do were done by the 70s what they said their plan was in the uh 70s for the 90s they got done and then

8:24

when they had their Agenda 21 in Rio de Janeiro in 1992 the big un Summit they described everything they would do up

8:30

until the year 2000 and they got almost all of that done now they've got agenda 2030 and we're going to ban your gas

8:37

stoves we're going to ban beef we're going to ban single family dwellings uh we're going to ban private ownership of

8:42

cars we're going to do all this and and now you see them rolling it all out so I'm not really making predictions in

8:48

these high level World economic forum and other large Think Tank groups they

8:54

are laying out the future and they're they're high priest of the world economic Forum it's a Consortium of all these groups groups youve all know

9:00

Harari you can read his quotes the future is not human the human era is over uh the public is useless I mean

9:08

this is a very antihuman system so that's how I'm able to make predictions because they've given us a road map they tell us where they want to take us and so when the public wakes up we push back on some

9:16

of it but they always come back and so I'm just following the trajectory of where they say they want to take us and

9:28

there were a lot of white paper ERS uh not just uh the PAC document from 2000 a

9:34

year before 911 where they describe we really need big Terror attacks we really

9:39

need Pearl Harbor events to get Americans to give up their rights I mean take what just happened in Israel

9:44

totally tragic my heart goes out to all that you been killed or lost Lov ones or been injured uh but there's no way that

9:52

one of the best intelligence agencies in the world didn't know that was coming the massive buildup uh the 5,000

9:57

missiles the the paragliding attacks uh all of that and and and so there was clearly a standown there and now the

10:05

West will take more of the people's rights Israel will be able to crack down and take more of their people's rights

10:10

which is a big debate uh over there uh Hamas is being funded by Hezbollah which

10:16

is Iran we just had Biden a month ago give \$6 billion dollar to Iran and now

10:23

the mulas are bragging uh that they were behind the attack Hezbollah funding Hamas so really those aren't even

10:29

predictions it's clear that Hezbollah and Hamas have tens of thousands of men

10:34

and women as sleeper cells that are quote other than Mexican that the boorder patrol list every month tens of

10:40

thousands coming across the Texas and Arizona and California sectors and it it's an easy equation to predict that

10:46

there's a wide probability that Hezbollah and Hamas at some point are going to attack sports stadiums they're

10:53

going to attack colleges they're going to attack synagogues they're going to uh you know shoot up Mass Gatherings uh if

10:59

they're given the order by Iran if we go to war with Iran and then when this happens our government won't get in

11:05

trouble for dissolving the border and letting these people come in just like on 911 our government clearly had prior

11:10

knowledge there was clearly a major standown that went on and the government got more power more control and now

11:16

they're not pointing the homeland security apparatus at the Russians like they did in the cold war or the islamist

11:23

is after 911 now they admit that their main focus is Christian conservatives

11:28

and the bit clingers and the people that live in Rural America that what white people I mean it says that in the report

11:35

are the main Terror threat and so this whole apparatus of the war on terror has

11:41

now been turned inwardly against the people not just here but also in Europe uh where if someone criticizes

11:48

transgenderism in the UK they come to their house and arrest them uh if a journalist does that they come to their

11:53

house and arrest them if somebody says I think these surveillance cameras should start getting cut down they come to

11:58

their house they arrest them for their free speech and so this is a global Movement by the mega corporations by the

12:04

black rocks and the state streets and the vanguards to control 80 plus percent of world wealth uh to control our

12:10

behavior and Larry Fink of Black Rock has said that at the T SCP repeatedly we're going to use our control over all

12:16

this finance and this global social credit score we're rolling out to control people's behavior so so that's really what this is and then they use uh

12:24

the threat of global warming they use the threat of a virus they use the threat of radical Islam to take our

12:30

rights but we really are the target even if I by the way none of that seems implausible at this point I mean

12:37

just you're a measure of how the world has changed if you'd said this to me 15 years ago i' have been like you know

12:42

someone's a crackpot and it's not me and now after Co I nothing you said seems crazy at all I mean you may be right you

12:48

may be wrong but it's not out of the realm of possibility obviously but even if I disagree with what you just said I would think that's

12:54

pretty interesting it's interesting perspective why do you think you've committed no crime you'd be in jail if

13:00

you had why do you think they hate you so much because I do read their documents

13:08

and I do read their books and we were effectively getting a lot of people in the military and the intelligence

13:14

agencies who were compartmentalized and who tuned into my show and saw my films and read my books

13:20

and things and they clicked with it and said wow I see all this going on around

13:27

me he's not lying about it and then I would give them other pieces that I discovered or my other guests discovered and so it was giving them an operational

13:34

awareness outside of their compartmentalization and so we had massive uh success in the military in

13:42

the police and in the intelligence agencies not just here but around the world and and so our penetration into

13:49

those areas to to help people expand their awareness

13:55

that were inside the government inside corporations was triggering a lot of whistleblowers was triggering a lot of people not going

14:01

along with the program and so really my sin was decompartmentalization of the

14:06

population when you got deplatformed and it to this day no one has ever been more

14:12

aggressively censored I don't think than you um I've apologized to you this in person before I was in Labrador on a

14:17

fishing trip and missed the entire thing I was literally out of cell range um I didn't know what happened but I got back

14:23

and I was and I read about it I felt like it was a major moment in the history of the American Media I don't

14:29

think anybody defended you when that happened anybody with any kind of audience for me when Tim Cook admitted

14:35

that he met on the weekend in in August of 2017 with the other big Tech heads

14:40

and they made the decision to curate like it's a museum and and and take me off it was hundreds of platforms I mean

14:46

it wasn't just all the big ones it was everything from LinkedIn to our bank accounts being taken away uh to

14:52

everything using that week and over the next month and I knew that I was a test case and I wasn't taken

14:59

uh you know off those platforms for any demonstrable reason it was the uh questioning the school shooting thing

15:05

that came later they went and kind of dredged that up for my past just questioning it a few times blew that up

15:11

after I've been deplatformed and said I was deplatformed for that if you check the record I wasn't and and and so once

15:18

they need platforming it made the show in ways only get bigger with people actually going to MW wars.com and

15:23

finding me on local radio stations and things so then they panicked and said okay let's look at his record and create

15:28

more of a reason he's being taken off so they took things out of context from five six years before blew them up as a

15:35

current thing out of context and deceptively reported on what I'd said to create a straw man argument to then

15:41

facilitate the reason what what's so crazy is if you asked just a cross-section of Americans who's

15:47

responsible for the Sandy Hook massacre of kids at the school no one remembers the name of the murderer Adam

15:53

Lanza okay thank you I didn't remember Alex Jones they affected blamed you for

15:59

a school shooting that you were not president at I have people come up to me in the parking lot you can ask my security guy he's been there when people

16:05

walk up and go why' you kill those kids and then you go I didn't kill those kids and they go yeah you did and and and so

16:12

that is what this is turned into but and this is bigger than me I don't people understand something that the molas in

16:19

Iran and the Ayatollah are congratulating Hamas that just killed around a thousand

16:26

or more innocent Israelis many of them women children disabled people in a vicious evil sneak attack they are on

16:32

there Hezbollah and and and Hamas mainly Hamas but it's Hezbollah funding it out of Iran are literally posting videos of

16:39

them cutting people's heads off and killing children and and massacring innocent people they're allowed to have

16:45

their Hezbollah accounts and their Hamas accounts the Ayatollah is able to

16:52

congratulate what these people done and I am still banned and I'm not mad at Elon Musk I understand I've been so

16:57

demonized with the general public he's barely able to you know keep Twitter going right now I really appreciate what

17:03

he's done I admire him I think he's done a lot of great work and and I see him moving in the right direction so a lot

17:08

of people attack musk on Twitter uh you know I Trend all the time hey if you're if you're such an absolutist on Free

17:13

Speech bring back Alex Jones uh I understand that if he did that the ADL

17:18

and others would really be able to to probably shut down Twitter so so I understand that he needs to you go

17:25

through a process before he does that so people get mad at Twitter for not ADL I I don't I mean I'm not the world's

17:31

expert on your career but I I don't I I know you I've never heard you say a single anti-semitic thing and an

17:38

anti-israel thing why would the ADL be against you I don't I don't think you've

17:43

I don't think anyone's even called you an anti-semite well unless I'm missing something I mean what goes on is the

17:49

left forever called everybody a racist if you were just a conservative or Pro Second Amendment or pro- lifee or

17:54

thought we ought to have a border and that didn't work anymore to call people racist and so the ADL gets

18:01

all this big liberal donations and so they go out and then police and take

18:07

people's sponsors and and and Target them uh just by the ADL calling up

18:13

sponsors sponsors get scared and drop and so that's what they've done to Elon Musk they've been you know they took over 50% of Twitter's uh North American

18:21

and European advertising uh in just the last year and and bragged about it uh by

18:26

by saying he gives Harbor uh to white supremacist which which which he doesn't but at the same time the white

18:33

supremacists are are ridiculous they're goofy most of them are usually working for foundations are basically you know

18:38

actors we're not supposed to say that but there's many cases of that actually being the case and that they're just laring that they're white supremacist

18:45

but let those clowns speak whatever happened to the ACLU that used to support the KKK marching through a town

18:52

or publishing their own newspaper I don't support the KKK I think they're a joke but if you take their rights you've

18:57

taken everybody's but but they're not even taking the rights of those people to post because they create fear and

19:02

they get the ADL more funding but if they can Target an Alex Jones or Elon Musk or Tucker Carlson uh then they're

19:09

going after the real populist leaders that are bringing America together and so what the left wants is to divide us

19:14

all according to race uh and to come out and say fundamentally with critical race theory that inherently being white is

19:21

bad and teaching 5-year-old white children they're inherently bad because they're white that is wounding their

19:26

brains and and really creating division why do people put up with that I don't understand why I mean that's just if you

19:33

had told me 20 years ago and I grew up in a world where judging people on the bases that were skin color was totally

19:38

immoral and and I still believe that but if you told me 20 years ago we were going to live in a world where people get on TV and like I hate white people

19:45

they're bad no it's totally fine like what why do people put up with that like there should be zero tolerance for that

19:51

I don't get it the Democratic Party founded the KKK and when the majority were whites in the South in some areas

19:59

they played the race card for political power now that the majority in most areas are not white they're playing the

20:04

good oldfashioned race card of tell whites you know stand down let people take over your Society your culture give

20:10

up your culture it's it's embarrassing to be white and then now it's flat out bad to be white and the left's trying to

20:17

convert all these minority groups that are now the majority in most areas into race based systems because that is a

20:24

very effective system why did people put up with that I mean like if they were doing that to Malaysians or Filipinos or

20:29

Hondurans I would say you can't do that you're not allowed to attack people on the basis of their race I'm sorry not in

20:35

a country like this because the country will fall apart and it's immoral I totally agree but nobody says anything I don't get it the reason they've done it

20:42

is most of the enforcers of this are white liberal women 45 or older not fair

20:49

it's just a fact and they're cuckolded husbands and so to them can I just say

20:55

that the phrase cuckolded husbands is the best really is true so if you get around

21:00

these white liberals they live in the whitest areas they're totally scared of anybody with brown skin but they virt

21:06

signal constantly and then say yes the white people are are bad you know the white people are are evil uh and you

21:14

know these these I mean I've even seen white people sit up there and say yeah it's time to deal with with these

21:20

crackers and they're a white person saying that so from Jackson Hall or Nantucket or Aspen or Bethesda the whest

21:27

place is in America so shouldn't there be a lot super simple if you've got a BLM sign in your yard you should be

21:34

required to live in Gary Indiana or Baltimore like there you should not be anywhere near Jackson Wyoming you should

21:41

be made to live in East St Louis I totally agree you should be made to live in Detroit yes and but of course they've

21:48

done the studies they look at the statistics it's not just here it's in Europe and it's in the UK like in London

21:53

the liberal areas are like 99% white oh I noticed okay there's a lot of rich people in in London that aren't white

21:59

but they're not even in that area they are the most insular group and and then they point at 22:07

White Christian culture and society that actually outlawed slavery in most of the world was the Vanguard of stopping it

22:14

and then they don't point at China which is the most uh homogeneous racist group

22:19

in the world it's an ethnostate it's Han Chinese period Well they teach as you know in their news that we are going to

22:25

have Chinese superiority we are the Chinese supremacist uh xping admires Hitler uh he is 22:31

literally following a race-based operation that is taking the world over that owns the majority of Hollywood

22:37

that's that's paid off the Democratic party and if you look at all these anti-white uh shows that you see funded

22:43

in in Hollywood almost all of it has majority literal communist Chinese government backing that is funding this

22:50

so it's real simple China looks in and sees this diverse culture and they say we're going to use that to split the

22:56

country up and balkanize it and that's what they've done and and so communist China along with the Southern Property

23:01

Law Center and the ADL and all these groups see America's weakness and they're literally coming in saying white

23:07

people are inherently bad because the color of their skin they're inherently Have Cheated people they've hurt people

23:13

white people invented racism none of that's true it's really just tribalism and then they organize all these other

23:20

groups into race-based groups to then unify them under the Democratic party to

23:25

attack who is left that tends to be more conservative and that is some white

23:31

people in this country though they're panicking because more and more blacks are voting Republican more and more Hispanic voting Republic and they're

23:37

starting to figure this out so now they're in panic mode to bring in totally disenfranchised third world

23:42

populations who are refugees from the multi-year lockdowns in in Africa Latin America and Asia in the Middle East they

23:49

then bring them to un camps brainwash them then bring them to our border brainwash them more then send them into

23:55

the United States and then literally hold them for years at facilities while they're indoctrinated to be this new

24:01

political underclass that's then going to be turned loose on America and that's why you see Democrats giving illegal

24:07

aliens the right to vote in their cities giving them driver's license that's why you see them passing laws they can be

24:12

police officers so they are importing uh a a a new enforcement class uh against

24:18

the American people and they're setting it up along racial lines not us they're making it racial just like Hitler uh

24:25

made what he did racial so so it's the left and the think tanks and the Communist Chinese that look at the US

24:32

and have seen our weakness as race and they are exacerbating so I I don't

24:37

understand so you're you're from Texas you grew up in Texas your family's been there a long time Texas is uh changing

24:44

really fast it's dirty for one thing I noticed uh because physically dirty

24:49

garbage on the side of the road I never have seen that in Texas before so your Governor could have stopped that He

24:55

commands the Texas National Guard and he didn't and I feel like that makes him a traitor

25:00

to the country but what am I missing well I mean I Governor Abbott is

25:06

on a scale of 1 to 10 you know the best kind of Republican Governor is a 10 and and the worst is say a one and like

25:14

Illinois it's a so-called Republican that's really a Democrat I would put Greg Abbott as about a five uh the the

25:21

state is overwhelmed uh there isn't really a state mechanism it's Federal to

25:27

kick people back back and Deport them so they have put up barbwire they have tried to stop people they have tried but

25:32

then they have to hand them over to the feds who release them but why why not you say the feds are committing a crime

25:37

they're committing a crime this is not allowed under laws passed by the Congress in a democracy Congress passed laws and um so you've got criminals

25:45

running the country the B Administration is Criminal which is true and we're not we're not playing along and like if you

25:51

don't like it come do something about it meanwhile every able-bodied man with a Black Rifle assemble at the border and

25:56

we're just going to stop this save the country I don't understand like that's not hard what what am I missing no I think you're absolutely right in fact

26:02

what the Deep State fears would be a coalition of good Governors good attorney generals giving them the findings and the rulings that they can

26:09

indeed do that and then declaring emergencies in the states and having a coalition of the states uh come in and

26:16

do this and then instruct local police and everybody else to not have Sanctuary cities but the problem is if you're in

26:23

Texas every single City Houston San Antonio Austin Dallas Fort Worth are

26:30

Democrat Party run uh and so Texas is almost purple because the California influx and

26:36

all the other refugees from New York many of them bring uh their leftist ideology with them even though they're

26:42

fleeing it like Locust they fly to the next field uh and so that's really the

26:47

issue uh is that uh the the legislature is somewhat cucked to use that word

26:54

again and I think the governor has been cucked he certainly went along with lockdowns and masks more than really any

27:00

other Republican Governor uh and so I do think Greg abot uh needs to do a better job but I I also wanted to list some of

27:06

the things that the state is up against but I'll say this Austin fired a bunch of police and another third quit crime

27:12

everywhere homeless everywhere trash everywhere ruin the city like everywhere else they are you you live there

27:18

absolutely you that's where my family's from I've been there since high school but but I'm going to have to leave soon

27:24

because it's it's it's it's gotten more and more like Los Angeles every day very sad to see it people fleeing la like my

27:30

friend Joe Rogan it seems great to him because he went from a really really bad situation into a bad situation uh but if

27:35

you've been there you can you can see the decline you can see how fast it is and uh it's it's really really really

27:43

really sad and there are just illegal aliens everywhere and refugees from the

27:49

rest of the country all over the place uh and you see really the economic decline of most

27:55

of the mom and pop businesses and things so the same rot we've seen all over the country Austin was supposedly this big

28:01

Mecca and it was going to be so great and now sadly it's falling apart I mean Tucker you know the answer to all this

28:08

you do the best job of anybody with a true Americana populist breakdown the

28:13

ruling Elites of the world the the black rocks the state streets they're on

28:20

record saying they don't want our consumer Society they don't want our capitalist Society uh it's bad it's ugly

28:26

it's gross but they're the biggest consumers compared to anybody else in the world their their quote carbon

28:32

Footprints are thousands of times bigger than the average person Leonardo DiCaprio or or Claus Schwab literally

28:37

have Caron putut friends thousands of times bigger than the average poor working American that they're telling

28:43

you can't have a car air conditioning remember before Obama left office he traveled to Latin America to Africa in

28:49

the Middle East and what did he tell him in speeches the clips are famous you can't have a car air conditioning the Earth will overheat and burn up while

28:56

he's telling people that by the year 2017 like Al Gore said we would have areas flooded on the coastal areas while

29:04

he bought a big house in Martha Vineyard at one foot above sea level and of course it's still there and it hasn't

29:09

flooded I mean a chef died there you drown sadly but no flooding inside the house just the dead Chef so they're

29:16

Waging War against civilization and Society to make us poor to to to put us under siege and to

29:24

to cut off our energy make the cost of living impossible to break our old system to

29:31

bring in something even worse and that's the cloward and Piven strategy that the Democratic party has adopted they've

29:36

done the same thing in Europe This is a plan the central banks have unlimited money but they can't buy all the

29:42

infrastructure up because people aren't selling so they've got to crush us and make people so poor that everybody's

29:48

forced to sell their business uh their intellectual property uh their physical

29:53

property but more importantly to turn over our bodies to them where a UN treaty that uh oiden right now is That's

30:01

What I Call Biden is obiden is trying to ratify would literally put our bodies under the control of the United Nations

30:08

and our Medical Care policy under it so it's the pandemic pandemic treaty yeah so what this is is is really a Breaking

30:15

of our will a demoralization that's what the transgenderism is and two men can have a baby and uh puberty blockers and

30:21

castrating little boys and cutting little girls breast off they've got such hellish stuff coming in this designed

30:28

Global collapse to bring in their world government that they've got to just have all these Horrors out there hoping we

30:34

just throw up our hands and run off to the countryside which everybody's doing

30:39

in a way that's good but at the same time then they've got full control totally right and they're going to March

30:44

out of the countryside next and dig us out so that's I mean it you look at the

30:49

White House Press Secretary who can barely speak English who's one of the stupidest people I've ever seen and a

30:55

transparent liar you wouldn't hi hire her to run your copy machine she's the white esper secretary why would you do

31:01

that and it's not because of her race or who she sleeps with I think the whole point is she's so obviously repulsive

31:09

that it makes you feel bad about the country to see her that I mean I mean that's it we're at a beautiful ball it's

31:15

prom night everybody's dressed great there's wonderful food big delicious punch bowl and then they say what can we

31:20

do well just have Brian stelter go take a dump right in that yeah and and then he's there laughing at you all they're

31:27

laughing at you to make you feel small to make you question reality why is

31:32

everything so ugly I mean that's why they tell people hey you can be homeless anywhere you can crap on the Street

31:38

Needles throw your garbage everywhere drug dealers can sell you drugs uh we're going to give the homeless all this

31:43

Government funding liberal groups come in and farm and milk each homeless person and skim a big cut of the money

31:49

off the top it's it's a crop but then you a cash crop but then we see that we

31:55

think it's all over there's nothing we can do to demoralize us and make us give

32:00

up and even though I'm conscious of this even though I know this it's still at a DNA level I'm like I got to go to the

32:07

country I got to get out of here I've got to separate myself from this but then when they release this toxic

32:12

cultural poisonous gas they push us out of those areas and they get the main infrastructure yes to then organize that

32:19

cut off the food and supplies to that group they have and then tell them the reason you're doing bad is not Black

32:25

Rock and the WF and Bill Gates it's all those evil people in the countryside they're all white supremist

32:31

and terrorists and racist let's go get them because the last group they don't control is rural people that are

32:38

self-sufficient and so I get going to the countryside protecting your children uh that I mean that's the Holy Grail the

32:45

problem is you got to have one foot in each you got to go back and fight in the city for the infrastructure for the

32:50

government you got to give people hope while also building a backup operation with farming and and ranching and selfs

32:57

efficiency so that's why the WF and the UN are coming in in in Ireland and in

33:04

areas of Asia and in the Netherlands and saying by 2030 80% of your cows have got to be dead and they just banned like 30%

33:11

this year in the Netherlands and it didn't matter people were 80% against it in polls it didn't matter uh they sent

33:17

the military in against the peaceful Farmers that were just protesting just like the peaceful truckers in Canada got

33:22

brutally attacked and so they're all wef globalist alumni that the big banks on

33:28

record brag they've penetrated the cabinets to to quote CLA Schwab they've put their operatives in to cut off our

33:34

energy demoralize US release the hardened criminals put the political activist in prison uh continue to cut

33:40

off the resources to make an angrier World CLA Schwab says we're g to make the world collapse we're gonna have

33:47

everybody turn against each other we're going to blame the political classes that we own in control and then when

33:52

we're done we'll bring in our new solution but first they have to demolish the cultures and societies that we had

33:59

before with the fenel with the open borders with the demoralization and then they bring in their next phase which is

34:05

a high-tech casual Society robot drone controlled nightmare uh more than half

34:11

of the US in their official un maps that they've had for more than 25 years they're in some of my first films show

34:18

half the US off limits to humans uh all cars left to have GPS Everybody by law

34:23

left to have a cell phone at all times Australia just did this last year you try to push it through and that's

34:29

the admitted Global un standardized plan where you don't leave your house without a cell phone every car uh is is uh robot

34:37

kill switch GPS controlled California's moving to ban all the quote classic cars that's any car that doesn't have a

34:43

digital uh ignition and they admit it's for control so if people think things

34:48

are bad now the straight jacket the ball and chain is going on it's all being militarily run our military is great men

34:56

and women but at the top our military has been globalist trained New World Order people for at least 30 40 years

35:02

they've got almost every General every person under their control and that's why it came out in the UK and and Europe

35:08

and also here in Canada you pull up the headlines defense department purposely

35:14

scared public into lockdowns masking and taking inoculations uh UK headline

35:20

British Ministry of Defense secretly brainwashed and terrorized public Canada same headline they even let you know

35:27

oh the military is here to do this and now oh the CIA and justice department is

35:32

there to help surveil the public to stop disinformation and it turned out of course almost all that disinformation

35:38

was true uh about everything so we have to understand our governments have been

35:44

seized the big corporations want to get rid of the American idea you got 50

35:50

acres and your house and a business and a farm and you can take care of your family and and and you're independent

35:57

they have to destroy all that because the rest of the world aspires to that instead they want 15minute cities

36:04

Central Bank digital currencies uh they want uh all of these systems that track

36:10

and Trace everything you do in the social credit scores and the plan for the rest of the

36:18

public I mean we're talking 99% is 250 square foot coffin Apartments uh 5G

36:25

bathing you in them uh literally eating bug protein and I told people 10 years ago they're going to push bugs on the

36:31

public because I read it in their white papers now it's already in grocery stores all over the us all over Europe

36:37

uh they're they're they're putting the Cricut meal into the food very toxic undisclosed yeah it's got kitan in it

36:43

yeah they'll just give it a number it's like it's got like a code and you ask again why would you do that because it's

36:49

all about breaking our will they don't want people to Aspire to open free

36:55

societies yeah there's a lot of ways there's decadence There's issues but there's Freedom they want to train us to

37:00

live on carbon rationing food rationing a very dystopic World you'll own nothing

37:06

you'll have nothing and you'll be happy these are quotes I have to say I I bet there are I don't know how long into

37:11

this we are 30 minutes or something I bet there are a lot of people watching who are thinking holy smokes I can't

37:17

believe I'm agreeing with Alex Jones I'm supposed to hate this guy like where's the lie in what you just saidon I'm not

37:22

sucking up I'm sincere like I'm listening to this and even myself I'm thinking I can't believe I'm nodding along to Alex Jones and being like

37:27

you're absolutely right like what where are you wrong well I just hope people realize that we're all under the gun so

37:35

many of these leftists believe that because they go along with this they're going to be given powerful positions in this system this is a technocracy

37:41

there's almost no managers in this almost nobody has power in the system except a very small group of technocrats

37:48

who happen to be transhumanist and you said something really astute a few weeks ago in a speech you gave and and you've

37:53

also talked about on your show that all of this still from their fear and denial of death so

38:00

one of the um things I find so striking about you having watched you on and off over the years and this must be

38:07

a burden for you personally but your ability to see people at a deeper level or to see

38:13

things in them that are not obvious to the rest of us and I want to give a specific example so there's a guy called

38:20

Brian stelter who had a the media show on CNN I first met Brian stelter when he was a high school student or a first

38:26

year col student because he would hang around the show I worked on at the time at CNN this was 20 years ago at least

38:32

and I always thought he was awkward and weird and probably had a super creepy

38:37

personal life but I never took him seriously there's a pretty famous clip and I want to play it right now of you

38:44

critiquing Brian stelter and you take him way more seriously than I ever did and I think

38:50

you're right to so this is pretty famous clip of you on Brian stelter hell on

38:56

earth right back you understand that you understand that

39:02

Delta I've only watched that several hundred times um and I laugh every time but I also there's something to if Brian

39:09

stelter had absolute power would you and your family survive of course not you wouldn't you'd be of course not and

39:15

neither would mine so there's a lot that's true about what you said how did you perceive that the rest of us just

39:21

made fun of him now once they started the censorship and the platforming remember back then they would it oh yeah

39:27

we're taking people off air but it's not censorship now they admit no it's censorship we're doing this for your own good so he was really the face of that

39:34

and he was working for the head of CNN that was really in charge of it it later came out uh CNN currently is not in

39:40

charge they've handed it completely over to the justice department to quarterback as Congress reported a few months ago with the documents but at the time Brian

39:48

steller and his Min me oliv Darcy his popey were going around calling up and

39:54

harassing my sponsors taking sponsors away uh and they were going around and organizing big Tech uh to to take uh not

40:02

just myself but many other people offline and so he was destroying our free speech he was taking our sponsors

40:09

but it's crazy I just want to restate you are not promoting race hatred you're against race hatred you never have

40:14

promoted that ever you're not promoting violence you've never called for

40:19

violence and you've never even called for breaking the law and so that's why there's so much anger there because I

40:24

remember the day I did that in a few other clips that viral I showed all the stuff he was doing but then the the

40:30

media attacked me and just click clicked it out of context but still it reverberated with people because people

40:35

were sick of the corporate Legacy Media so people say well why is he so angry well it's because he's literally trying

40:42

to take us off air literally taking our sponsors May the equivalent of the Vikings a thousand years ago in England

40:48

pulling up and burning a village down and so there he is all sweet and liberal and cackling and laughing but he's

40:54

really an agent of anti-American totalitarianism and so he was the frontman of that and I wanted to just

41:00

simply say right I see you I know what you're doing so people see out of context I think why are you being so

41:05

mean to him well I mean he's literally trying to destroy my free speech take me off air and and put my family on the

41:11

street so I'm pissed off at it what's interesting is and I I mean I don't know if you want me to reveal this but we had

41:17

dinner in our barn last night and there were some drinks and uh after dinner you

41:22

and my producer called stelter on the phone and what was so and it was on speaker so I listened to it what was so

41:28

interesting was you know you've been very clear in a very direct pretty masculine way I would say about how you

41:35

feel about Brian stelter there's not a lot of confusion about your views on stelter after Clips like that which doubtless he seen because he Googles

41:40

himself compulsively he was very kind of syrupy sweet with you and that's why I was

41:46

sarcastic and told him I want to date him you did yeah in fact the exact line

41:52

that you had was Brian I'm not usually gay but I want you yeah and he seemed a little bit I'm not saying he's open to

41:58

it or whatever but he wasn't shocked by it he's like give me your phone number give me I want to talk to you yeah and then he hit your producer up please give me his number right now let's yeah that

42:03

was interesting but but I was being silly with him but but there was also a line he goes oh Alex Jones I said I want

42:10

you to come on my show he said oh you still got a show and I went no you're the one that doesn't have a show then

42:17

sorry I should the other line it's so borish to like recount conversations people weren't wit but you said you know

42:24

you you you know you're you're off TV now but you a real star I mean not on CNN but on my show so good anyway but what was interesting was if someone had talked about you that way and then called you

42:29

show so good anyway but what was interesting was if someone had talked about you that way and then called you

42:37

late night after a couple drinks you'd say you know up yours pal you know what I mean like buzz off or I'm not taking

42:43

your call but he kind of sucked up to you that's a very weird passive aggressive posture well I've said a lot

42:49

of really mean things about him and attacked him and when I watched the clips out of context I feel guilty but

42:54

he was going around with Oliver Darcy they would brag on Twitter and literally hitting hundreds of my sponsors and I

42:59

say hundreds I'd have like 20 they'd take them all I get 20 more take them all this went on for years so you go get a sponsor you get them they're doing

43:05

great he takes it away from you and then he brags that him and I was taken off Twitter not for the Sandy Hook stuff

43:12

that came later that they focused on look it up uh they had U the former head of Twitter and the lawyer on Joe

43:18

Rogan about four years ago and Joe said why did you man Alex Jones lawyer goes okay let me open My My Clipboard she

43:24

goes here's why he was mean to Oliver Darcy so I'm at the capital they're having censorship hearings sunar Pai is

43:31

there I just confronted him in the hall runs Google and you guys are welcome to use that if you want and then that was at the Senate so now they were going

43:37

over for a house meeting and there's Oliver Darcy in the line he gets to get in I don't even get into a hearing where

43:43

they then attacked me they'd attacked me at the last hearing but I don't get to face my accuser and so I get in his face

43:48

I don't threaten him but I say you are an evil man you're unamerican coming after my free speech harassing my

43:54

sponsors trying to get me off the internet and the last place I was on was Twitter they held out uh and so Jack

44:00

dorsy had held out and so Jack dorsy admitted well the last straw was I bullied Oliver Darcy and so that's why I

44:08

was deplatformed Elon mus thinks it was the Sandy Hook thing uh and and notice do you know that in most cultures

44:13

bullying Oliver Darcy would be like a right of passage like you couldn't like that would be a positive good right well

44:20

but here's the thing he's literally on Twitter taking my sponsors calling for me to be silenced so he's been attacked

44:26

me attacking my speech and my and my living and then all I do is shove a camera in his face while he's waiting to

44:31

go into the hearing for five minutes and say man you are unamerican you you you got some evil eyes and I said you really

44:38

look like a piece of slime I mean I told him that and fair fair and and so the point is he's a man he's a quote

44:44

journalist in the arena he goes around harassing people and stalking them uh financially and and their free speech he

44:51

he'd already bragged that he'd gotten me taken off all this other stuff and that he was instrumental which was and then he can't take me saying man you're a

44:59

jerk right this is the classic posture you know stop hitting me he says as he

45:05

you know fires a gun through your windshield I mean exactly they can dish it out but they can't take it so what's

45:10

the effect on you and I don't mean even the lawsuits against you and there was there was an effort to criminally indict

45:17

you I guess just for having bad opinions or whatever a bunch of them a bunch of them they had four grand juries I've had to respond to subpoena my Lord when

45:24

you've committed no crime you're not you're like the one of the only people in India who's not jinning up race

45:30

hatred I would say just to be totally clear because it's very common to do that you don't do that and but so anyway

45:36

and then of course this billion dollar judgment against you for having naughty opinions which is insane I'm not even

45:42

talking about that I just mean what's it like to spend 25 30 years connecting the

45:47

dots and seeing this slow moving Storm come toward the country that you were born in what a what a effect does it

45:56

have on you since you use the analogy of a storm it'd be like if I was 100 years

46:01

ago before they had radar and I've read about the famous flood 120 something years ago in Galvis

46:07

that killed tens of thousands of people yeah the hurricane yeah yeah the hurricane they didn't know they didn't have radar and so they didn't know but

46:14

uh you know they are the fishermen out there catching shrimp or whatever and then all of a sudden Here Comes basically a tidal wave and if I was one

46:22

of those fishermen and I knew my children and my wife were on shore at school or work or whatever and here

46:28

comes a 40 50 foot wave I know was about to kill him I would not be thinking about myself watching this giant wave

46:33

come in I'd go oh my God my wife and kids are over there and so it's not that

46:38

I'm a hero it's not even a selflessness I realized that I was just out in front and ahead of some people in

46:45

understanding this because of family and and research and just you know things in my life that I saw that encouraged me to

46:50

get involved in the media because I was aware of the global some things that were going on because my uncle was high

46:55

level I ran Contra had some other family uh that you worked in clandestine things so I kind of grew

47:01

up uh just around folks that knew what was really going on and you're a kid you don't really pay attention to it but you

47:07

kind of get that education even though you don't know you're getting it and so I've just been out front so I would

47:13

liken it to in the old days when the dam would break and they didn't have radio to warn people and the Dam breaks and

47:18

it's 20 foot wave coming down the valley and you are down below the dam as you

47:24

let's say a uh Lumberjack and you know your wife and children are two miles down and you see the dam break and

47:30

you're about to drown but I guarantee the last thought you're thinking is it's going to get my women and children and and that's that's really my grief is

47:38

this is really Draconian this globalist great reset New World Order takeovers a post-industrial world cut off the

47:45

resources 90% forestry population breaking Civilization by Design massive

47:50

Wars famine they've already cut off a third of the fertilizer in last year worldwide it's estimated that'll kill a

47:55

couple hundred million people the lockdowns worldwide not the virus the UN admits killed 80 something million extra people in the last three and a half

48:02

years and and and and and so when the first world collapses the third world dies and then what's left of them floods

48:07

us and so the Earth is being put into a countdown collapse right now and so I'm like the fisherman when the Title Wave

48:14

comes in and I'm like oh my God my wife and children are about to die and and and so I'm not really worried about me

48:20

because I'm a man I did this I knew it was coming I've been proven right and I'm not happy I was proven right I wish

48:26

we could have gotten ahead of this and stopped it yeah we have a lot of credibility now that people see that we

48:31

were right so maybe we can stop the next phase of it but the globalists have gone from testing phase beta test phase into

48:39

full operational now and they say read their writings we are going to have a post-industrial world by 2030 we will

48:45

have no personal cars by 2030 you will be eating bugs by 2030 and we will start

48:51

uh the the depopulation of 90% of the People by 2045 that is the official WF

48:57

official un official Club of Rome plan what do you mean the depopulation they want to bring the

49:03

world population down to 500 million but I thought we were opposed to genocide no or no I guess we're not well

49:11

you know we're told now don't have children it's bth of the earth and we're told all this and Elon Musk is right and

49:16

is a hero for pointing out all the actuar show if you don't have 2.1 children a man and a woman people go a

49:22

man and a woman can have 2.1 it's it's in the aggregate folks out of billions if a country doesn't have 2.1 2.2

49:28

replacement rate then you don't have people to take care of the old folks Society collapses and so Japan's 1.3

49:35

Italy's 1.3 they're done as cultures uh America without immigrant influx is

49:41

about 1.6 that's not that's not viable uh and so and I'm not just talking about

49:47

white people only here but white people are 7% of the world population maybe eight uh and so I would be sad if the

49:54

last of the eskimos were dying I I mean I'm sad that the Japanese within a hundred years there might be 20

50:00

million of them but just to my previous question about and without getting too personal but like what I mean I feel a

50:06

little bit innervated and down just hearing your dot connecting here like what's the effect on you over 25 years I

50:13

mean if you literally foresee 911 before it happens and you did and it can be proven we just proved it like what is

50:20

that what's that like to live with that weird ability well I mean I know specific CL

50:26

um I I specifically say call the White House tell them we know they're going to let Al-Qaeda attack us Bin Laden and

50:31

then and then and then take our rights I say call the White House I I put the number out so I put my money where mouth

50:36

was and that's the only time I ever said call the White House and tell them stop a particular event I'm now saying we need to call the White House and say

50:43

you've let tens of thousands of military age men from the Middle East in we know a lot of them are Hezbollah and and

50:48

Hamas the FBI's confirmed that and so when and if there's big Terror attacks which I believe will probably happen in

50:54

America we're not going to have Homeland Security get more funds and more power and grop us at the airports more I want

51:00

prison time for uh the agencies and grips that have allowed this and I and I want I want o Biden I want Biden impeach

51:08

now okay that's why we got rid of McCarthy it it needs to happen leaving the Border open when there is a clear

51:14

and present danger of this going on and when we're very close to war with Iran we go to war with Iran they're going to activate Hezbollah okay and then that

51:21

they they make Hamas look like choir boys and and so you want to hear a prediction here it's a probability not a

51:28

pure prediction but I mean I if we go to war with Iran guaranteed sleeper cells

51:33

activate it'll make what happen in Israel look tame in comparison I'm not lening what happened there so I I'm

51:39

simply then again where's the logic the government that allows that to happen should go to prison I agree but instead

51:45

like 911 they're going to get more power when it happens mark my words so so you

51:50

you can't have guns because we let in foreign sleeper cells to kill you exactly and and you asked the question

51:57

this is really taking a toll on me not the fake lawsuits not the weaponization not not the platforming uh I was already

52:04

getting exhausted five six years ago and when I married my second wife who's amazing I have three children with my

52:10

previous wife and one one you know they're all great children and one with her we were in Hawaii getting married

52:16

like seven years ago and I said to her I said I want to just write books and make

52:21

documentary films and maybe do an occasional podcast I at that time I've been on air like 20 22 years uh 6 days a

52:29

week three hours a day at least and I said I just don't want this burden this

52:35

big crew I love the crew but I don't want to do this anymore I said I want to move the country and uh I want to uh

52:42

just you know because he taking a physical toll to every day look at the stuff and now I've gotten the point

52:48

which even though I say don't let them break your will don't let them demoralize you that's because I understand the process it's happened to

52:53

me used to I'd have hundreds of incred incredible stories and clips every day I couldn't wait to expose the bad guys now

52:59

I look at it once I'm ready I study it and then half the time I get on air and I just go let's just take calls or I

53:07

start talking about some fun story just because I mentally cannot sit there and

53:12

stare into the abyss and stare at Biden or you know their press secretary that's

53:19

meant to enrage us and demoralize us and I think that's a defense mechanism that's healthy so I think we all have to be balanced I'm ask you people to only

53:26

fight tyranny uh I'm ask people to get prepared get ready but wake up as many people as you can and then do whatever

53:33

you have to to stay sane because this we have record suicide we have record depression we have record drug abuse uh

53:39

this country has been attacked and if you read deeper in the globalist writings they admit they're doing it uh

53:45

and so we have to be aware of it if you're aware of an attack and aware of a manipulation it doesn't give you full

53:51

immunity from it uh no it doesn't but it it it it but but it gives you a buffer

53:56

here imagine people that don't know what's going on and they really believe things are dangerous things are bad not

54:02

because of the corrupt corporations that are running things but because those evil people in the countryside don't want to be left alone that's what

54:08

they're saying on the news it's the it's the people in the middle of nowhere that want to be left alone they're the bad guys and it's the it's the 5-year-old

54:14

you know kid that's white you know they're really bad they're all inherently really bad and just just this is a demonic assault and and and it

54:21

really is good versus evil but the key part you raised earlier in prev shows that I mentioned that I didn't get into

54:26

because there's so many topics is this when you said we need to brood on

54:34

death you talk about a sympatico or a synchronicity or a weird moment I don't

54:39

usually watch your show when it first releases one day because I'm usually at work and doing stuff tonight but I'll get up at like 400 or 5 in the morning

54:45

hours before my wife and daughter get up and I will start you know get on the desktop start doing research and one of

54:51

the and when I'm reading news and sending stuff for the crew for the show I'll almost always go click on your show to watch it and you you know that's the

54:59

go-to thing I I'll have on the background and I said well I'm not going to click on the show I'm going on to click on the speech you gave a few weeks

55:05

ago when you talked about um brooding on death and I'm sitting there that week

55:11

literally thinking about the fact that we've got to be humble we've got to be thankful we've got to realize that

55:16

there's an infinite universe and Consciousness and that focusing on what made Humanity focusing on you know the

55:22

fact that we Are Spiritual Beings but the this life is finite and these incredible experiences all the people

55:28

we've met and known and all the ancestors before us that did incredible things and went through hell and we're

55:33

tough as nails to get us here really ties us into our ancestors and the

55:39

epigenetic instinctive knowledge uh that really makes us a colony or hybrid

55:45

creature of all of our ancestors we have a soul we have a spirit we have our genetic

55:51

uh imprint that that they've proven mathematically is multi multidimensional even above the third dimension so we

55:56

have a personal Spirit but really we also have a collective bodysuit that is

56:02

a collection of all of our ancestors and just the Beauty and the wonderment and

56:07

the spectacular of that dwelling on how how incredible that is but also leaning

56:13

into eternity and leaning in to this body and and this Incarnation uh and I'm

56:20

I'm not saying reincarnation Incarnation uh being so magical

56:25

and that also that death is the great equalizer and that you will be humbled

56:31

and you will get old and your teeth will fall out and you and your hair will fall out and you will get cancer or you will

56:36

have a heart attack and no matter how powerful you are you're not in control in that it it Tunes you into God and

56:42

then what you said so I'm heavily focused on this and telling my wife this and I'm meeting with my dad who's really

56:47

my mom I don't see them as much as I should my dad's really always told me this and I didn't really get it when I

56:53

was younger now I get it you know as I get older and I'm sitting there just literally praying that morning and

56:58

drinking coffee and just focusing on death and just focusing on life because you focus on death it makes life so much

57:03

bigger and focusing on what I'm not a Hindu and I'm not a u sik but the siks

57:10

are like a 500 year old version of 3,000 year old Hinduism and they they think everything's a manifestation of God in

57:16

the universe around us and then interfacing and how we take every moment of how magic it is is what's going to

57:22

resonate in the future to bring us close to God so that we basically resonate into the higher Dimension with God and

57:27

that's really been my instinctive understanding of it spiritual understanding the dream understanding of it I didn't read in books and I read

57:34

what the seeks were saying it's basically I was reading some of their writings just a month ago and and it was about focusing on death so you also

57:41

understand life and being humble and being a servant and and how that's what empowers you so you're not an

57:46

like your dad would tell you you know you know you focus on the fact that I'm I'm an and shouldn't be we all have the side yes you have a

57:53

better quote but the of your dad's quot the root of all wisdom is knowing what an you are and it really is my

57:58

dad always says the root of all thing is is being humble and appreciating things and not getting on a power trip basically what your dad's saying yeah

58:05

and so because that's that's wise men and and and so I'm sitting there totally

58:10

focused for like I would call it meditation for like 30 minutes just sitting there in the dark with the computer screen on and I go no I'm not

58:17

gonna watch Tucker show from yesterday I'm going to watch this speech and I click it and I'm like 10 minutes in you go we got a saying everything I'm saying

58:24

I didn't even said this on air I'm hearing you say basically the same thing because it's a universal truth then I

58:29

want to bring the next piece to it which you talked about you grew up in the super wealthy Area California when you weren't you know spending your Summers

58:35

here in Maine and speaking for I watch show all the time and you read your material it's beautiful and you were

58:43

talking about how they're totally freaked out of neurotic and crazy because no one talks about death everybody shelves away the old people

58:49

they basically put them out on an ice float or you know burn them like the Vikings and that by doing that that's

58:56

what makes them not be connected to reason and God and and the deeper things and that's why they're so lost that's

59:01

totally true so let me now take you one step further in this the globalists are so scared of death they have all this

59:07

money all this power all this control so they're obsessed with finding life extension technology merging with

59:12

machines becoming Gods that's their new religion that's the transhumanism and that's where all their funding goes but

59:19

that's only one side of the coin the other side is that if you're going to be God you've got to be in charge of death

59:26

so because they fear death and they project their hatred of themselves onto us then they can poison us dumb us down

59:33

sterilize us depopulate us they believe that's more for them at a very greedy level so they want to be death the

59:40

destroyer of worlds to quote Oppenheimer I become death destroyer of worlds and at the same time cheat death so it's a

59:46

total subconscious obsession with death instead of consciously focusing on it getting over it instead they turn it

59:52

loose to their animal lower alligator brain and are now manifesting all this because they've not embraced the higher

59:59

level of understanding I agree with that completely but it's doomed as a project no I mean it is the Tower of Babel

1:00:06

whenever you see in history is the story of this people drunk on their own power

1:00:13

overstating their control over things becoming convinced their God and then

1:00:18

being destroyed I mean that is just I mean it is just an endless loop of that story it's a law of humans it's a law

1:00:25

exactly so this can't I mean this isn't going to work they're going to blow up the world before they do this there it's

1:00:30

not possible you just stole my thunder because we've not talked before this we've talked about a lot of stuff but nothing about the show really it's a law

1:00:37

just like gravity just like  $2 + 2 = 4$  it is the fabric of the universe and I

1:00:43

was about to say in the past megalomaniacs try to control everything order the firstborn you know killed

1:00:49

almost every Kingdom would do that whether it was Egypt or The Druids oh there's too many young men being born

1:00:54

kill him I mean you know depopulation has always been there in the time of Plato 2,500 years ago he thought the

1:01:00

world was overpopulated and that's kind of where the Eugenics comes from and where they get these ideas you know the greatest philosopher ever who said a lot

1:01:07

of great things but also said there's too many Greeks we need to kill most of them you know they're animals they're dumb we need to control breeding and

1:01:12

only makes Supermen that's where Hitler got all that that's where all this comes from but the the central issue here

1:01:19

is in the past civilizations would just fall apart when they got into a decadent phase you know hard men make good times

1:01:26

good men makes hard men make good times good times make soft men soft men make

1:01:33

bad times exactly and so instead of going through that cycle and the collapse of that corrupt system now

1:01:39

there's biological weapons chemical weapons nuclear weapons all this other advanced stuff instead they're going to

1:01:46

try to use the robots and all the control and the nuclear weapons to make us finally get under their mark of the

1:01:51

beast finally get under their unified system of control finally get under their social credit score which was

1:01:57

predicted by you know these incredibly connected people 2,000 years ago that this would be the ultimate Tyrant that

1:02:02

was coming almost not almost psychically seeing it into the future because of the great evil potential time's really a

1:02:08

loop it was looping back or bouncing back real psychics seeing into the future what was going to happen in

1:02:14

Revelation as a potential I believe and is actually a warning that we don't have to follow that course and and and and

1:02:20

that's my own personal belief so uh so instead whether you believe Revelation or not they're the evil globalist the

1:02:27

selfish globalist are using it as a blueprint and literally building the mark of the beast casual Society where

1:02:33

you don't just oh I agree to take this Mark I can buy and sell now you have to worship the Beast that can be seen by all on Earth at the same time it

1:02:39

describes these big Holograms you got to watch and worship and it tells you what to do and it tells you how to live and it says men become women and women

1:02:46

become men and children are set upon their parents and there's nothing but wickedness being invented and it

1:02:51

describes everything that's now happening and says when they roll this out you got to worship this world

1:02:57

government you got to worship this system and do exactly what it says or it doesn't let you buy and sell and and so

1:03:04

whether people believe in the Bible or not believe in Revelation or not it is now

1:03:09

manifesting I don't see a lie in that I don't think I am a Christian but I don't think you need to be one uh to arrive at

1:03:16

exactly the same conclusion so you live in Austin Texas you've been there since high school Austin's changed a lot and

1:03:24

uh as you noted it's been really overwhelmed by people from the West Coast fleeing the decayed societies that

1:03:29

they built you live among liberals now what do you make of them what do they

1:03:35

like I really feel sorry for them because compared to say my dad's dad yeah like you were telling me about your

1:03:42

uh your Foreman or your you know manager knows how to do electricity knows how to build houses knows how to fish hunt you

1:03:49

we just saw that Big Moose he got today yeah uh these these guys are impressive and they can do everything my

1:03:55

grandfather could do everything uh he could fix a combine with literally rubber bands and tin cans he you cut up

1:04:02

into pieces and my dad's the same way I'm a shadow of them and their can do uh

1:04:08

and compared to liberals I'm like Lighty years ahead of them they

1:04:15

live in highrises they get food delivered to them uh they they're not in reality uh they don't have common sense

1:04:23

they go out the most danger dous areas that I wouldn't go into armed in in in in places like New York dangerous areas

1:04:29

of Austin and get stabbed raped murdered killed then they defend the people their families do that killed them uh they

1:04:36

just are like pod people uh they are just these obsolete creatures that most

1:04:41

of them have I guess jobs because they work for big Tech or the system but they are just completely disconnected

1:04:48

domesticated very very politically ignorant culturally ignorant historically ignorant people and they

1:04:54

think they're elitist they think they know a lot they think they understand a lot they're totally useless what what do

1:04:59

they do for fun well I was about to say and they're the ones that want to depopulate they're the ones that think that uh like Bloomberg said oh what's a

1:05:07

farmer do it's easy to stick a seed in the ground and it grows farming is incredibly hard you better know what

1:05:12

you're doing and you got to have the weather on your side and it's a All Around the Clock job I've had family

1:05:18

that are farmers my dad grew up as a farmer and a Rancher I've in the Summers they would send me to work on farms and

1:05:23

ranch is best education I ever got it's rough it's it's it's tough uh and but is

1:05:29

it really essential is food really essential well we're told by John KY in

1:05:34

the last few months he says we need to cut farming now organic farming is is he still alive the earth I don't think he I

1:05:41

think it's a corpse it seems he seems like a corpse like a rubber face an animatronic Chuck-E-Cheese I thought he

1:05:46

passed years ago but somebody told me he's still alive I don't I guess it's an open question he runs around giving speeches saying we've got to cut farming

1:05:53

uh or people are going to starve I'm not joking I'm not joking

1:05:59

that's what I'm saying cut down trees cut the food off cut the fertilizer off to save people well speaking of starving

1:06:06

I mean again as I said at the outset and I meant this I've never seen a single person I don't think there ever has been

1:06:12

a person in the history of the United States who was not criminally charged but was punished to the extent that you

1:06:17

have been I mean they've really tried to drive you into the grave I think to be fair it's been worse for Trump but I'm the second

1:06:24

yeah that might be right he has much bigger resources though to back him up oh absolutely of political party you're

1:06:30

I've spent everything i' I'm completely out of money I'm still hanging on but yeah Trump still has resources I I I

1:06:36

don't they lied about my resources too said I had all this resources now it's been proven it wasn't true uh so yeah

1:06:42

they've definitely they it was more than a billion dollar judgment against you for saying something other people didn't like I guess well let's be clear

1:06:49

misrepresenting what I said I was defaulted by both judges of Texas and Connecticut and the judge said I was

1:06:54

guilty then wouldn't let us put on a defense and had a jury decide the damages then they put on Experts saying

1:07:00

I was worth \$400 million when I had a couple million dollars last year in my account during the last trial now I have

1:07:05

nothing I'm actually upside down uh right now and so that's so how are you I

1:07:11

mean how are you I mean they've decided like you're not allowed to make a living in this country you've been not just deplatformed but deerson

1:07:18

debanked um how do you make a living well I have been maxed out personally

1:07:23

I'm in bankrupt but I've done a chapter 11 some chapter 5 reorganization for free speech systems that is the company that owns infow Wars

1:07:30

and so that company's barely paying its bills and is is is is operating but

1:07:35

we're barely hanging on I personally uh never you know had that much stuff contr what they said so it really hasn't hurt

1:07:42

me that much I'm not really into fancy things or a bunch of ostentatious lifestyle contrary to what they've said

1:07:48

uh and so we're we're funding the operation we're selling products we're what are you selling I mean well you

1:07:54

know we sell books films t-shirts we sell high quality supplements then they call it snake oil but we sell the same

1:08:00

stuff private labeled uh the whole food sells just you know high-end high quality stuff I've it's not just a

1:08:05

fundraiser I've got the book The Great Awakening defeating the globalist and launching the next great Renaissance my

1:08:11

last book that came out last year was a number one bestseller uh on the USA Today and Wall Street Journal but uh did

1:08:18

they list it on their list well the New York Times They did New York Times refused to even put it on the list even

1:08:23

though it was number one this is my new book that isn't just the bad stuff they're doing with a huge breakdown with

1:08:30

all the proof at the back it is also uh Solutions and how to counter

1:08:35

them so this book will keep us on air plus it's a great book I hope people get it at infowarsstore.com or they can also

1:08:42

get sign copies there or they can go to amazon.com but yeah this is a way to keep us on air plus it really is an

1:08:48

amazing book if people want to see a lot of the stuff I told you but with footnotes so you can go right to it

1:08:55

everything I say when I say Naval Noah Harari says the future is not human and that the population uh is no longer

1:09:01

needed and the future you know there'll be no more humans you can actually go to where he said it uh when I said that

1:09:08

Jeffrey Epstein was running a massage C MI6 operation to uh blackmail top

1:09:14

scientist to control them we have links to that when I say Peter nigar that's on trial right now was having women have

1:09:20

babies his babies so they could abort them at eight months and then he could suck all their juices out and inject

1:09:26

them into himself a a real vampire that literally takes the juices of his children puts them in his body we have a

1:09:32

transcript of him saying that on TV who is this Peter niggard is one of the big buddies of Epstein and all them he was

1:09:37

kind of running his own Jeffrey Epstein operation also in the Caribbean uh so I mean I mean this book is super super

1:09:45

hardcore it's got an amazing forward uh by Steve Bannon and they had a great researcher it's also a lawyer Kent

1:09:51

hecken Lively went through and double checked everything I said for the book obviously so they wouldn't get

1:09:58

sued so this thing is well researched well documented it is the Great Awakening because the Great Awakening is

1:10:03

the counter to the globalist great reset to destroy society and then build back

1:10:09

better but it seems asymmetrical at best I mean you have all the power on the globe ra on one side and then the

1:10:16

majority that doesn't like it so I mean like how how do decent people Prevail

1:10:24

they believe they can push it by deception that's why people are aware of

1:10:30

why they're cutting off the fertilizer to collapse the third world to then flood us with those giant populations

1:10:35

they will then control and give voting rights to and if you don't want to give them voting rights then you're a racist

1:10:40

see that's why the lockdown's biggest crime wasn't just the 80 plus million the UN estimates starve to death the

1:10:47

last three and a half years on top of the normal 15 million that star of death each year you look this

1:10:52

up they then use those giant masses of people that are fleeing total collapse

1:10:58

as their new political underclass so so that's why it's so vital to not just challenge the great reset and the New

1:11:04

World Order Eugenics operation of the transhumanist it's vital to then give an alternative plan and and have an

1:11:12

alternative debate about that plan and that's what the Great Awakening gets into so but if you give up in that you

1:11:18

also sell bourbon man you are really being nice today terer well you know why

1:11:24

you know I want I I hate selling products but I like this product because I love the name look at this right here

1:11:29

this my friends is a gift to your crew because I know they drank I had some drinks with them last night when we call

1:11:35

Brian stelter this some of the crew does drink yes that's true so so this is for you we got a few other bottles for you

1:11:41

out there s I can't even open this thing thing sealed maybe it got locked on the airplane anyways can somebody open this

1:11:47

I'm like here embarrassing no hold on I think the the center thing I don't I don't travel with guns very often so I

1:11:53

don't know operate these I'm going to smash this son of a

1:11:59

watch there we go son of a all right God damn

1:12:04

it look at that it doesn't come like this in stores I'm kill the people that

1:12:10

came up with this walk that into the studio we're

1:12:17

rolling don't kill me all right we're rolling I don't think that plug should be oh my God

1:12:24

I got a lot of points when you get to here okay that was amazing this whiskey does not come with a hatchet to open it

1:12:29

um or a black light but if you does it come with a black light no but if you have one but if you have a black light by the way I don't think I've ever

1:12:36

sold a product on the air but I'm proud to we appreciate you suppor dude come on I'm totally all about it

1:12:42

um what does that say I'm gonna let you read that it says uh thus the tyrants meaning death to tyrance yeah I I

1:12:49

recognize that phrase I think it was Ed in Ford's Theater thank you brother well enough of that I didn't mean to turn

1:12:54

into who so I I want to the book is more important but the last topic I want to hit with

1:13:01

you I could go on for hours we're trying to we're trying to get the audience of

1:13:07

this social media app to believe that you can have longer content because it was you know originally designed for

1:13:12

very short you know brain droppings but well I think you've succeeded the biggest English speaking show ever I

1:13:19

mean it's bigger than Jimmy Carson bigger than Joe Rogan congratulations showing that freedom is successful and

1:13:25

well we're grateful that it's a no I'm grateful to you you we have Free Speech but I I anyway but here's here's my

1:13:30

question so all of the trends that you describe I think very credibly and I'm a

1:13:36

little bit surprised but not at all ashamed to say I agree with pretty much everything that you've said amazingly

1:13:41

but I do and I think most reasonable people if they just drop the kind of filter and stop lying to themselves and

1:13:47

and ask like where's the lie and what he's saying I think we come to the same conclusion but all of those Trends are

1:13:53

being forced to kind of ahead or or they're going to come to fruition or something's going to happen in the next

1:13:59

13 months because we have a presidential election on the books and you have this

1:14:04

car crash I just do not see how it's resolved do you like what's going to happen again I it's the truth really the

1:14:11

only show I watch every day is yours when you have a new show because I don't just agree with you I learn stuff every

1:14:16

time and what you've been saying the last few months is dead on and and a lot of people agree with you and I know I do

1:14:22

that you look at the trajectory of this how they're escalating on Trump whether you love him or hate him he's now a

1:14:28

populist icon uh he he's now the underdog uh the globalists are coming after him they're coming after our right

1:14:34

to vote for who we want he gets 60% against which is the fundamental right in a democracy I the people rule I can

1:14:40

vote for whomever I want it and if you don't like that person that's immaterial absolutely and he's been indicted for

1:14:46

saying they're stealing elections they're stealing it trying oh I'm aware absolutely in their indictments of him

1:14:52

is election but yes so so but despite that he's got 60% against

1:14:58

all the Republicans he's 15 20 points ahead of Biden it's backfired but the Deep State's not going to stop so when

1:15:04

you said to Trump several times in that 400 million views or whatever you got biggest show ever you know you said to

1:15:10

him well isn't the next thing I'm trying to kill you and he he he's so confident he doesn't want to think about that and

1:15:15

where whe he doesn't want to think about it whereas I admire someone that's that confident you know the Deep state

1:15:22

does kill people and and and and that's their only next move because this is failing and and I think they're going to

1:15:28

kill Biden too or I think they're going to try to what you said in a speech again before the last one I talked about like a month ago you said I don't see

1:15:36

Biden and Trump being the candidates you see the system the media going after

1:15:42

Biden and he deserves it but they were covering it up until now now they're covering the laptop now they're covering

1:15:47

attack on the dog now they're covering you know all of his senility all the corruption the Chinese spies hacking a

1:15:53

dog what a pig he is I'm sorry well I mean I was told that by secret service and by uh people that let's just say

1:16:00

work with them and I'm GNA leave it at that but and I actually have a contact for you I'll actually be able to hear it from them but when this is over I'll let

1:16:06

you actually hear it from yourself I think they'll tell you off record I think they're willing to talk to you uh but yeah he he he is completely out of

1:16:11

his mind he wanders around for the entire two and a half years it's getting worse naked in the wine house uh in the

1:16:18

middle of the night doesn't know who he is they have to give him a bunch of drugs a bunch of amphetamines in the morning morning then they've got to drug

1:16:24

him uh at night sometimes he's got to though he'll like be out for the morning for a while and he comes back out at

1:16:29

night for a ball that's when there's a real problem he is on drugs I I have established that I know someone who witnessed it I'm not guessing at this I

1:16:36

know someone personally who witnessed him uh taking amphetamines and this was

1:16:42

this was during the 2016 20 2020 election so how's this gonna that's huge I know you don't play games you've been

1:16:48

no I don't play games with this it was a I'll just say he was a makeup artist you said the n say spying on me

1:16:54

high level and then a month later they went yes we're spying on T Carlson yeah I know so so you don't make stuff up and so what I'm saying here

1:17:00

is Biden's a liability for him Trump's a liability what do they do they have a right-winger they'll claim assassinate

1:17:07

Biden and they'll have a left Winger assassinate Trump that then gets the country even in more of a fight against

1:17:13

each other and then they put in Gavin Newsome uh and you know somebody like

1:17:18

Mike Pence or who knows but I really think the next 13 months is the most critical time not just in American

1:17:23

history but world history because if they can bring down America they're going to bring down the world then you've got the escalation remember a

1:17:29

year ago Biden said you can't give f-16s and and and uh Abram's tanks and cruise

1:17:35

missiles to the ukrainians that's World War III now they're doing it so as Russia wins that war as colon McGregor

1:17:41

documented a few months ago with you NATO is escalating well that leads right to nuclear war so we're so close that

1:17:47

fundamentally makes me so mad this trans sense politics since when do Democrats love war since TN Democrats love the

1:17:54

intelligence agencies they they love them now and so really the Democratic just like the Republican party is a

1:17:59

beach head for sanity and populism it's not perfect but it's a beach head the Democratic party is totally turned over

1:18:05

to evil that's why I thought RFK Jr was so refreshing but they're shutting him out of the primary process they're

1:18:11

blocking him and so now he's going to run third party which will take away from Trump most experts agree I know

1:18:16

Trump's people have looked at they think so of course so that's very very sad so do I mean do you think I mean

1:18:24

normally at this you know so we're in October I guess um in the year before the election you can sort of see the

1:18:30

outlines it's pretty clear I mean in October of 1999 I was pretty confident it was going to be George W bush versus

1:18:38

Al Gore I mean you sort of know ahead of time but do you think that we're going to see on Election Day 2024 a ballot

1:18:44

with Biden and Trump on it I've been saying I think they may

1:18:50

assassinate him or claiming had a heart attack and then but I was thinking about each one individually but I think when

1:18:56

you said that a month ago was preent that that's the next move that's the if I get in their mind and I'm evil I'm

1:19:02

mackelli that is what they have to do because but the election just forces the point I mean I guess I actually don't

1:19:08

think that their preference is overt violence or anything that people notice I mean they much rather resort to

1:19:15

stealth right covert rather than overt but I just think you know there's an election on the books and like

1:19:20

something's going to happen well that's what you're saying all their tactics of covert aren't working so as we saw with

1:19:25

JFK in 1963 in Dallas they will go over uh and and so we have Governors

1:19:30

declaring emergencies to take the guns all of that is and suddenly Democrats are against Sanctuary cities when

1:19:37

they're the ones saying governor hoel and and and the mayor of New York come here come here now they're like oh

1:19:43

we never said come here I think it's Dawning on Democrats they've been betrayed and maybe there's some point

1:19:50

where Democrats will have self-preservation the the average voter and and say no we need to turn against

1:19:55

this this is totalitarian this is dangerous this is evil uh but if that isn't the case the Deep here's the

1:20:01

problem even if Democrats wake up be the system will know that from their internal polls The Establishment will

1:20:08

they're going to make a big move and is that a full out war with Russia a full out war with China is it is it them

1:20:14

allowing the Jihadi sleeper cells they're in America that have porn across

1:20:19

our border that are waiting to let them activate and I'm not saying government controls them but they've let other governments bring them in and they've

1:20:26

given funding to those governments and now if we don't see strong signals against against Iran I don't want war

1:20:32

with Iran what I'm saying is strong signals telling Iran do not fund Terror groups and we don't see strong

1:20:38

repudiation of Joe Biden that will Greenlight the security services to go ahead and let this new attack happen and

1:20:44

a massive Jihadi attack in America could be the way to bring in martial law and

1:20:50

cancel the election also CL Schwab loves the telegraph says the UN it is imminent

1:20:55

a Cyber attack bringing down the power grid will make Co look like absolutely

1:21:00

nothing it's basically his quote I think I got it almost exactly and and and so will they cut the power before the

1:21:07

election I mean the sky is the limit the sky is the limit so people need to be vigilant and understand that we want to

1:21:15

let the system know we're aware we want to promote the values of free speech and

1:21:20

of family and of self defense and of local control and of free market rugged

1:21:26

individualism and a competitive civilization and a colorblind society that Martin Luther King Jr talked about

1:21:31

we need to go back to the things that made us great that threatened the CCP and threaten the globalist of the UN

1:21:37

because they're selling tyranny and eating bugs and being locked down in your houses and forced injections and

1:21:42

two men can have a baby we're selling normal human biology and success in

1:21:47

culture and so I just think we have to give the alternate plan to their dystopia we have to challenge their

1:21:54

dystopia but also give the alternate plan which enough people aren't doing but but that's Trump's big sin is his

1:22:01

optimism America's great everybody's beautiful we have such potential and as soon as the world heard America was open

1:22:07

for business we saw trillions flood instantly in because our leaders had said America's not open for business

1:22:13

invest in China and India and Mexico where the globalist have middleman deals to get all the money and all the power

1:22:19

instead of the people getting it it was Henry Ford wasn't a perfect guy but he he said the other auto manufacturers

1:22:27

this this came out in federal documents and later Annie trust suits because you know he didn't get in trouble they did

1:22:32

they said to him the other autom manufacturers they said why are you going to pay your employees three times

1:22:38

what we do and he said because I won't just I don't want just rich people buying my cars I want my employees to

1:22:45

Prime the market to buy it they'll give me all the money back buying the Model T

1:22:50

and then that'll supercharge it so that's the two different systems build this illustrious incredibly exciting

1:22:56

roaring civilization of L fair or let these big guys already made all the money centralize control shut us all

1:23:03

down and vertically integrate so they're in control and then kill competition so we have to kill the globalist program

1:23:11

that's anti-free Market anti- capitalist it's monopolistic it's antihuman it's

1:23:16

it's a bunch of degenerate inbred third fourth generation Elites who didn't make

1:23:21

all this money who didn't create all this stuff but that have decided we don't even get to take part in it while

1:23:27

they take part in it and live like kings so it's us or them Tucker and and we've got to crush the globalists we've got to

1:23:34

crush the New World Order we've got to challenge them or they're going to destroy the planet I believe that last

1:23:40

question where will you be in five years you going to stay in this country can you stay in this country I mean speaking of

1:23:46

escalation again I I still have never figured out what your crime is but you have been persecuted for something thing

1:23:53

um in in an escalating way I got two subpoenas last week subpoenas I got

1:24:00

subpoenas uh on January 6 again on a criminal investigation he didn't do anything on January 6 and I got subpoena

1:24:06

in Trump's criminal trial in Georgia on what on What and then my

1:24:12

lawyer called and said what is this and uh the uh they said

1:24:17

well we don't just want him as a witness he's a subject had nothing to do with Georgia

1:24:23

I'm not saying it's bad they went and challenged it that's their right I mean I went and protested there so it's just pure intimidation so I have a problem

1:24:31

it's that I don't like to cut and run I'm not the toughest guy around but growing up in Dallas was some pretty rough people some big guys started a

1:24:38

fight with me I I just couldn't back off uh and I almost always won those fights or or or you know went to the hospital

1:24:43

trying and so I decided to go down with the ship uh I'm not going to uh I'm not

1:24:49

going to leave the country uh I'm not going to back down and I'm going to continue to fight with everything I've

1:24:55

got I'll never sell out I'll never give in I could give out that's why support's critical in Word of Mouth because Alex

1:25:01

Jones is seen as a focal point like Capture the Flag by the globalist if they can shut me down they believe they can shut anybody down they've said that

1:25:08

and so it's human intelligence and Human Action and Word of Mouth talking about infowars.com my show what I do is a test

1:25:15

case almost like Stalingrad in World War II where all these forces of the globalist keep thinking we beat this guy

1:25:21

at this city at this point at this battle we win and so I don't think I'm even that important I've just been

1:25:27

chosen as this main battle point so all these Grassroots people and people like you and other great folks are supporting

1:25:33

me through just supporting the First Amendment and you and so I've got that backing and that enrages the globalist

1:25:40

so the more they throw against me the more support I get and it's really become a historic battle if I'm

1:25:46

completely banned and debanked and shut down and can't operate uh only then

1:25:51

would I try to evacuate somewhere to try to keep my show on the air but I've looked at it and I don't even think that

1:25:57

that's the case you know once they disrupt and shut down something um it's it's very hard to restart it the good

1:26:03

news is there are so many other great talk show hosts so many other great people that now understand this and even

1:26:09

have perspectives better than mine that I'm not obsolete yet but thanks to you and thanks to Russell Brand they're

1:26:16

trying to Now set up and you know Joe Rogan's come a long way and Steve Bannon and countless other shows that I into

1:26:22

that have high level understanding and teach me a lot and I'm in my head's in the game so you're our champion Tucker

1:26:28

and and and there are other people you know lesser I know I know you don't want to be the top dog but you are that's why you're under attack thanks to you I know

1:26:35

no matter what happens to me men and women are going to continue the fight forward into the future but this is an

1:26:40

Alamo situation I'm not evacuating I'm not leaving I'm not going how' they do

1:26:46

with the Almo do you remember everybody got killed oh okay but but but but that example led to

1:26:52

a big big you know my mom's family uh raised Colonel Travis's son and and on

1:26:57

my dad's side too they were heavily involved First Texas families we have like Mexican land grants for our property we still have Mexican land we

1:27:04

paid for 12 cents an acre like 1825 uh in East Texas you know you come

1:27:09

visit it's not as cool as your place but it's pretty cool uh and uh the last letter he wrote on that piece of

1:27:15

wallpaper was uh to one of my great great great great great grandfathers in Gonzalez Texas saying please take care

1:27:20

of my little boy uh and so uh but Travis knew he was gonna die but he was like I

1:27:26

got 10,000 troops coming in on our 200 and something we're gonna give him one hell of a fight and kill a bunch of them

1:27:31

before they can get up north for the main battle and they killed thousands 3,00 this estimated go for memory

1:27:38

Mexican troops and so I that'd be an honor to have like 10,000 troops coming to me and I'm in the Alamo I don't have

1:27:44

a death wish but man it gets me H as a kite and so I'm not doing what Colonel Travis did only reason they got beat is

1:27:50

they ran out of ammo basically they had powder but no more no more ball and they were fighting with swords at the end so

1:27:56

those are tough men and I don't even measure up to them but I want to try to measure up and so it's very exciting

1:28:02

it's it's instinctive it's spiritual to be defending humanity and prosperity and freedom and Justice against these

1:28:08

globalist child trafficking Monsters the open border all this evil I mean so my my cells tell me to do this my guts my

1:28:16

sen you say you're ordered to do this and I don't feel good unless I do it and so the bigger the attacks get it's The

1:28:21

Old World War II saying when the planes were over the target they didn't really have radar but they knew the bases and the factories had flat so they're

1:28:27

shooting at them with artillery and aircraft artillery so you flew into that and so me the best place I want to be is

1:28:33

in the flak but I also hate the flak because we could blow up and we're not in the fight anymore so there's that

1:28:40

Paradox but 90% of me wants to be in the Flack 10% says maybe you should steer a little around it because you don't want

1:28:45

to get knocked out and and until just a few years ago I felt really bad because it didn't seem to Paradigm have been

1:28:51

shattered and people didn't actually read the globalist documents now there's been a paradigm shattering and I'm almost obsolete Tucker and as soon as

1:28:58

that happens as soon as I see another couple hundred more prominent people that actually know what's going on we've

1:29:03

already reached Chain Reaction point I'm gonna hang it up and disappear like Obi Wan Kenobi Alex Jones Thank you thank you

1:29:11

what a great conversation I really apprt you brought out at Paris fashion week

1:29:17

what why did you do that and what did it mean you know

1:29:24

I did I do certain things from a feeling I like I just I just channel the energy it just feels right it's

1:29:32

using a gut instinct a connection with God and just Brilliance you know like

1:29:40

it's if you ask like Tanya Harding how she did the the triple flip or the

1:29:46

triple spin she was in so much practice that when it was time for her to skate

1:29:53

in a in a comp competitive format it just happened like it happened outside of practice it happened in the real

1:29:59

format and that's what ha that's what's happening is God is like preparing us

1:30:04

for the real for the real battles and we are we are in a battle with the media

1:30:10

like the majority of the media has a a Godless agenda and the jokes are at

1:30:17

working this whole like oh yeah he's crazy and all these things they don't work because the media has you know

1:30:23

they've also watched traffic these happen just even specifically to me and just watch

1:30:30

it and act like it wasn't happening and they stay quiet about it uh what have

1:30:36

they what have they I want to answer the the white I feel like someone caught what I was saying the comparison of

1:30:42

Tanya Harden about the the white lives matter you know my dad is a

1:30:48

educated um ex Black Panther and he put a text to me today he said white

1:30:54

LS matter hahahaha and I said I thought the shirt was a funny shirt I thought

1:31:01

the idea of me wearing it was funny and I said dad what do you think it was funny he said just just a black man

1:31:09

stating the obvious yeah and you know my dad doesn't listen to

1:31:16

rap music and he's like super educated we we open up a water distrib ution

1:31:22

Center in the Dominican Republic together he's like the original Steve Jobs but he was getting blocked every

1:31:30

which way with all of his ideas and he didn't have uh a endless bank account

1:31:35

and he didn't have Instagram so all these ideas he had to like take them back and compress them like my dad is

1:31:42

the most brilliant person that I know and we actually have a strained relationship because I was taken from

1:31:49

him because my mom was an actress so she was a liberal and my dad would see

1:31:57

certain things and say you know we should do it this way we should do it that way and the people got around my

1:32:02

mom and pulled her away much like you know Kim is a Christian but she has

1:32:08

people who want her to go to interview magazine and put her ass out while she's a 40s something year old

1:32:14

multi-billionaire with four black children and this is what how fashion

1:32:19

wants to uh um how they want to present her so I know you give these um you give

1:32:25

these questions and I give you like these three-part answers is this a cool format for you follow okay cool and I am

1:32:30

following it all right so you said um that your father said when he saw the

1:32:36

shirt white lives matter it's great to see a black man stating the obvious so by which I think you meant that's

1:32:42

obviously true yeah that my favorite response cuz I kept on thinking like you know people they're looking for an

1:32:48

explanation and people say well as an artist you don't have to give an

1:32:53

explanation but as a leader you do yes I think that's right so the answer

1:33:00

to why I wrote White lives matter on a shirt is because they do it's the

1:33:06

obvious thing yeah why why do you think that's so and

1:33:12

and I assume the implications of course all lives matter because they're lives because God created them why do you think that that would be considered

1:33:20

controversial

1:33:26

because the same people that have stripped us of our identity and labeled

1:33:31

us as a as a color have told us what it means to be

1:33:37

black and the vernacular that we're supposed to have my

1:33:43

dad grew up as a military brat and his family moved around but

1:33:50

they are based mostly in Delaware and at the time if he wasn't if they weren't

1:33:57

the only black family they were one of the few and he would be discriminated

1:34:03

against because he was black so by the time he got into

1:34:08

college he would be discriminated against he went to a black college he would be discriminated

1:34:14

against because they said he talked to White yes and then he played the kick drum in the band so when he would go to

1:34:21

the club and the music was playing where would he clap his hands where the kick

1:34:27

drum is so it's the opposite of where everyone else was clapping their hands

1:34:33

and uh this is the most elegant and tasteful person that I

1:34:40

know and when my mom when they when when the

1:34:47

schools suggested like the hurting systems because what they do is take the um the black community and they separate

1:34:53

us and they separate the families and the educated uh they you know they push this

1:35:00

you know need for higher education and us as blacks we discriminate against each other and say well I got my PhD and

1:35:06

you don't have your PhD so I'm better than you and so my mom she had a PhD and

1:35:13

she was influenced to uh move to the south side of Chicago and take this job at Chicago State University and she told

1:35:20

my dad if you come if you come for us you know you'll never see him again because you

1:35:27

know the media ridiculed me for getting the house next door to Kim to see my

1:35:33

children and they even said that I was stalking her and her new boyfriend because I bought the house next door to

1:35:40

see my children and I that's that's how I knew that that uh that my mom had said

1:35:45

that to him I said dad you know they moved us to one of the most D agreed

1:35:51

upon to be one of the most dangerous places in the world it's almost like they tried to kill me or something uh I

1:35:58

said dad why didn't you ever why'd you never come to get us and that's when he told me that's

1:36:04

when he told me that she was told that you know there so many things that are put in Kim's head you know they bring

1:36:11

influencers like no one ever know where Cory gamble came from no one in the

1:36:16

fashion world knows where Gabby came from these people were practic made in a

1:36:22

laboratory in my opinion and one of the things that they're really good at doing

1:36:27

is being nice and being likable and what they do is for people that have some

1:36:35

form of influence whether it's an educated black woman like my mother that

1:36:40

became the head of the English Department at Chicago State University or whether it's the most

1:36:47

influential um white woman on the planet being my ex- wife they have people that

1:36:54

are around them at all times telling them what to be afraid of it's like not

1:36:59

what to do or say specifically it's what to be afraid of and if you have a person

1:37:04

that isn't afraid of them you know like

1:37:10

a Russell Bran or Candace ens it's not that we have to agree right with this

1:37:16

but they're not afraid they're not afraid to State what their opinion is yes no one is God and everyone has an

1:37:25

opinion so a conversation like this is a window into a world that you don't see

1:37:32

so if you're familiar with west from the media you think of him as an individual

1:37:38

man what you don't think about is that he is at the center of a battle and people like him at the center of a

1:37:44

battle to get a message out mouthed by the lips of influencers

1:37:49

like him and so many others that extends a storyline on behalf of

1:37:55

well in this case the status quo so there are a lot of people vying to make certain that people like him say the

1:38:01

right things and the consequences for not doing that are very severe so for him to come out and say all lives matter

1:38:06

obviously is a huge threat to a lot of people who are those people exactly well

1:38:12

we asked him and he told us that's [Music]

1:38:20

next if the average person goes on social media and expresses unapproved thoughts

1:38:26

it's a problem for the people in charge and if you keep doing it they will silence you and that has happened to countless people we've interviewed a lot

1:38:31

of them on this show but if you were to have say 18 million followers on Instagram and express unimproved

1:38:39

thoughts that wouldn't just be a problem for the people in charge it would be a Flatout emergency you are not reading

1:38:45

the script and you might lead others astray you're an apostate you are dangerous you're a witch and that's

1:38:52

effectively where the artist formerly known as Kanye West now called yay West finds himself tonight he will not be

1:38:59

controlled in fact in one of the most poignant moments in our exchange which we'll show you in a moment he was

1:39:05

shocked to discover that after becoming one of the most successful and richest people in the country he still wasn't

1:39:10

free to say what he thought and that changed his life that realization more of our conversation

1:39:16

with West now there's a group mod

1:39:21

it's like liberal Nazis that will go up and attack you

1:39:28

like I said you know everyone's like Anna winter is your friend I'm

1:39:33

like this Gabby girl and G and these

1:39:39

people um they would have never said anything negative unless they got the okay from condas unless they got the

1:39:46

okay from Anna they would have never got the okay to comment like let's just talk about

1:39:53

specifically so these are people who were attacking you for your T-shirt well it was a setup it started off

1:40:00

as um it started off

1:40:06

as them having this black girl comment and say well I felt traumatized when I

1:40:14

saw this t-shirt like this a black girl saying I felt traumatized when I saw

1:40:22

um a black man wearing something that he wasn't allowed to wear it's like in D  
1:40:27  
Jango when Jamie Fox is on top of a horse and Samuel Jackson's like you know  
1:40:34  
that black guy's not supposed to be on top of the horse okay and then I went  
1:40:39  
and said hey I don't like your boots I know Anna winter doesn't like your boots and you're not  
a fashion person and then  
1:40:46  
people started to say I was a bully but it was a setup and they  
1:40:52  
finally got it right because I eliminated the the BLM officer at  
1:40:58  
Adidas and then I got out of the Gap  
1:41:03  
deal and just one by one by one I just be I've been winning these battles right  
1:41:09  
and they thought they had me they had the idea that yay was  
1:41:14  
bullying uh what I think the term the liberal term is uh a body goes black  
1:41:21  
woman now let's talk about Gabby and my good friend lizo lizo works with my  
1:41:26  
trainer a friend of mine Harley PN Harley Harley Pac when lizo loses 10  
1:41:33  
pounds and announces it the Bots uh that's a term  
1:41:38  
for uh people like it's like telemarketer call callers like on Instagram they attack her for losing  
1:41:46  
weight because the media wants to put out a perception that being overweight  
1:41:53  
is the new goal when it's actually unhealthy let's get aside the fact of  
1:41:58  
whether it's fashion and Vogue which is not let's let's just or if someone  
1:42:04  
thinks it's attractive to each his own it's actually clinically  
1:42:10  
unhealthy and for people to to promote  
1:42:16  
that um it's a it's demonic you know can I ask I've noticed this  
1:42:23  
also yeah why do you think they would want to promote unhealthiness among the population  
it's a genocide of the black  
1:42:30  
race they want to kill us in any way they can Planned Parenthood was made by  
1:42:36  
Margaret Sanger a known Eugenics with the KKK and  
1:42:41

I believe that if we saw ourselves as more if we saw ourselves as a people and  
1:42:48  
not a race then we would treat Tre our people better like if you go to a Jewish person and  
you say a race it's it almost  
1:42:55  
gets confusing it'll cut you off quickly and say we're not a race we're a  
1:43:01  
people well our people supposed to just say Say It Loud I'm Black and I'm Proud  
1:43:07  
okay well what about do you own the land that you're living in do you own is the contracts  
even in a  
1:43:15  
language that's even possibly understandable right you know for your heritage you know and  
in  
1:43:25  
America we as blacks we'll like down each other on how good we speak but  
1:43:32  
we're speaking English there's nothing whiter than English we're not in our native tongue  
actually so we judge each  
1:43:40  
other on white um goal lines not based  
1:43:47  
on exactly what our culture is based on  
1:43:52  
so you can agree or you can disagree but it's pretty clear that what you just heard is not the  
approved script and  
1:43:59  
famous people must read from the approved script or else the whole system falls apart  
because then people might be  
1:44:07  
encouraged to think for themselves and once you do that it's a chain reaction that winds up  
with disobedience so  
1:44:12  
someone like Kanye now yay West must be controlled so he was a little surprised  
1:44:17  
to learn after his divorce that his former wife had in fact a close and secretive relation with  
the clintons  
1:44:25  
that they were working on her to influence him to read from the script pretty amazing he was  
shocked by it and  
1:44:31  
so were we that's [Applause] [Music]  
1:44:37  
next first indication that West might become a massive problem for the  
1:44:43  
industrial deception complex came in 2015 and 2016 When Donald Trump appeared  
1:44:48

and West had a very strong gut reaction to Trump that was very positive and the people around him were panicked by this

1:44:55

the last thing you could have as one of the most popular pop culture figures in America coming out for Donald Trump so

1:45:01

they applied intense pressure to get him back on the script and apparently his wife was part of that his former wife

1:45:06

Kim Kardashian who West now learns had a very close relationship with the Clintons and people around the Clintons

1:45:13

he had no idea his relationship with Trump on the other hand flourished and he got a wife into the people around Trump

1:45:20

and in this clip you'll hear him assess what happened inside the White House very interesting

1:45:27

watch it was interesting a friend of mine told me that uh Chris and Kim had called him

1:45:35

because he had influence inside of the black community uh and had called

1:45:43

him uh to say oh to get him to influence

1:45:50

people to take the vaccination mhm

1:45:59

and I I don't have opinion on that I just want to state that as a flat statement but it was it was wild that I

1:46:05

didn't know how close my own wife was to the

1:46:11

Clintons I didn't know you know I I I didn't realize it at the time think you

1:46:17

were married to her and well I was married to her how close was she to the

1:46:24

Clintons I mean cell phone away like or hey tell y'all to say this away or hey go

1:46:30

out and use your platform to push uh the vaccination away I mean not away but

1:46:35

like s the Away part but you know do you feel like at times you were manipulated by political forces through your

1:46:42

wife attempt manipulation but yes there was some manipulation me not saying I

1:46:48

like Trump was a form of uh a manipulation for sure yeah why did you

1:46:53

like him by the way you said you liked him early like you saw him I

1:47:01

mean uh I I keep telling this joke if people say Trump was the first black president I'm going to be the first

1:47:07

Latino president because all the values the the conservative values just line up

1:47:14

come on man Trump's this what do you mean he has his own buildings what are you talking about he's like like Ralph

1:47:20

in yeah he made Ivanka you like Ivanka

1:47:26

yeah you tweet you wrote a post on Instagram about her husband today yeah you

1:47:34

know I had a dinner with Ivanka Jared and

1:47:42

Josh and a couple days later I found out that Josh Kushner had

1:47:48

10% of skims which is a line that I had developed with Kim and I had a lot of

1:47:56

issues with the imagery of of skims I felt like there's a lot of imagery that

1:48:02

was overly sexualized and things that I wouldn't want to see my wife and definitely not my daughters doing in the

1:48:09

future in order to sell product uh but it it reaches another level when it's

1:48:17

like okay well this is what my wife is doing and this doing for this is what she's doing for our children but it

1:48:24

reaches another level when her business partners are selling pieces of company

1:48:29

that they don't have to because the company's already so successful and it's a internet based company so it's like

1:48:35

they're really just selling off the company in order to create more relationships for themselves that are

1:48:41

unnecessary it's like when I went to the Gap and with our release they just like uh they shoveled it out I'm very

1:48:49

cautious of with my words I'm really big on being able to have an adult conversation in front of the children so

1:48:56

I don't use explicit language uh in interviews especially

1:49:02

so I found out after this dinner that Josh Kushner had 10% of skims and I had

1:49:10

5% of skims and regardless if you know Josh

1:49:16

Kushner figured out how to put \$150 million I'm sure it wasn't out of his  
1:49:21  
own account but 150 million and I'm sure Jared still has a piece of that  
1:49:26  
fund uh they uh regardless of them putting  
1:49:32  
that money in for me to have been a owner in it and not known just from a  
1:49:37  
place as a creative where skims is so based on a lot of the easy ideas then  
1:49:43  
it's based on all of the relationships in fashion because I had to use my relationships in and  
fashion  
1:49:51  
in order to establish Kim in a way where fashionable people would say hey I'm I'm  
1:49:58  
I'm down to we Kim's line and these VCS they come in and they get a piece of it  
1:50:05  
after the fact and they run around and say they have ownership in it so as I put on my  
Instagram which you know  
1:50:12  
luckily for everyone they could just write it off that you know I'm crazy until they see my  
disposition in this  
1:50:18  
interview and then it's going to get scary uh they [Music]  
1:50:24  
um um I said hey Josh what if uh what if I had 10% of Carly Claus's  
1:50:33  
lingerie shapewear swimsuit line and you have 5% of it and you didn't  
1:50:43  
know how would that make you feel and then after after talking to  
1:50:50  
them and really sitting with Jared and sitting with Josh and finding out other pieces of  
1:50:57  
information I was like wow these guys might have really been holding Trump back and being  
very much a Handler right  
1:51:06  
then they love to just look at me or look at Trump like we're so crazy and  
1:51:11  
that they're the businessmen so when I think about all of these things that  
1:51:16  
Jared you know somehow doesn't enough credit for with his work and what is it  
1:51:23  
his work in Israel or his work in pal what what is this you know where he made  
1:51:28  
these peace treaties where was that do you know the facts on this right here so I'm like well I  
think that was between  
1:51:33  
Israel and and some of the Arab Nations I just think it was to make

1:51:38

money I don't know is that is that too heavy-handed to put on this platform no that's that's your opinion we're not in

1:51:44

a censorship business okay thank you and I just think that that's what they're

1:51:50

about is making money I don't think that they have the ability to make anything

1:51:55

on their own I think they're born into money and for me as a Maverick and a

1:52:01

talent and a person that's been you know beat kicked lost everything sad to have

1:52:09

lost my mind went from pull myself up by my boot my boots don't have straps on

1:52:15

them but I say pull myself up from my boots uh to become in a multi-billionaire that

1:52:22

gets uh that gets you know um the the

1:52:27

the price every year my my network goes down every year uh on Forbes they just

1:52:32

keep on slowly just taking it down every year it's like really a weird thing but as a person that has really built

1:52:39

something from nothing when I sit across the table from a Josh Kushner and he

1:52:45

just feels so entitled to that idea

1:52:50

and this person's never brought anything of value other than so-called being a good venture capitalist I have a major I

1:52:59

have a major issue with that and it makes me feel like they weren't serving my boy Trump the way we could have

1:53:06

because you know Trump wanted nothing but the best for this country and it

1:53:12

doesn't like Moses stuttered you saying God is not always going to bring the

1:53:19

most perfect personality a lot of times the most fake people their job is

1:53:25

talking and making people feel comfortable yeah you know and the realest people are going to make you

1:53:31

feel uncomfortable at [Music]

1:53:37

first yeah that's not shallow and it's also not crazy it's true whether you

1:53:43

agree with it or not so uh West has thought a lot about politics and he's

1:53:48

thought a lot about what's going to happen in 2024 you'll hear that coming up he's also very close to Elon Musk which we didn't know asked him off the

1:53:55

cuff do you know Elon Musk oh yes very close he's got a lot of thoughts on that too that's

1:54:06

next we told you at the top you'd be able to assess for yourself whether West

1:54:12

is crazy as virtually every single media Outlet on planet Earth claims every day

1:54:19

all year long is he crazy as you try to assess that ask is what you just heard

1:54:26

over the past 40 minutes any crazier than what you see on television every

1:54:31

day the lies the lunacy presented to you with a straight face as reality no it's

1:54:38

not it's not crazy at all he's a big thinker though we asked him about 2024 what he plans to do and also about Elon

1:54:43

Musk here it is people with power try to make other

1:54:49

people feel like they don't have any my power is through God so if

1:54:56

someone ever says anything like oh you did a great job it's praise God it's funny atheists love the term

1:55:04

narcissist when you believe in yourself right they say that it's

1:55:11

narcissistic you know I love the way I love the dynamic of how you

1:55:18

compare you you show that there's

1:55:24

still Humanity even with the position that God

1:55:29

has placed me in why did Moses Smite The Rock why did you get that

1:55:37

frustrated and just

1:55:42

to to be able to be gent gentle to be more gentle you know God is alive look

1:55:48

at this right here here look at look at how quiet it is right now it's only God

1:55:54

God is of order the devil is of chaos that is true you know we

1:55:59

are I I want to I want to talk

1:56:04

about my uh potential run for 2024 and Trump's uh potential run for

1:56:12

2024 and the Beloved Des santz potential run for 2024 and mayor Suarez potential

1:56:18

run for 2024 and you know they thought Trump was a

1:56:26

joke for older white people they're quick to classify a black person only by

1:56:35

the fact that we're black even even Trump a person that's you know we'd consider to be a friend of

1:56:41

mine uh when I went to the white house uh I called him um after that to

1:56:49

get ASAP Rocky out of jail and one of the things he said to me is you know

1:56:54

Kanye you're my friend when you came to the White House my black approval rating

1:56:59

went up 40% and for

1:57:07

politicians all black people are worth is approval is an approval

1:57:13

rating the Democrats feel that they don't owe us anything and Republicans

1:57:21

feel that they don't owe us anything blacks have never demanded

1:57:28

something for our vote and that's something I talked to Ice Cube about

1:57:33

what are we asking for how do we change our life if all of our organizations and

1:57:39

all of our colleges and even our title as black was made by white people all of our or all you know all of our

1:57:46

jobs and Black Wall Street um Harlem after gingerification there's

1:57:54

never been a fully blackowned Community where we we have all the municipalities

1:58:00

things that uh Dr Claude Anderson Anderson talks about we need that it's like 90% of

1:58:08

America is not even developed I'm not one of the people that go up and say Hey I want to stop anybody

1:58:16

from making money the people that make money and the powers that be I am your

1:58:22

true Nikolai Tesla and I'm not even a

1:58:28

scientist what do you think of Elon Musk do you know him very

1:58:34

well what's your take on him you said that because I said Tesla I did yeah it's the first thing that and and that

1:58:40

everyone's always like oh elon's got these answers I think he's a great I think he's a great team

1:58:47

player and there's a lot lot more to come a lot more and we address specifically why do they call you crazy

1:58:55

and he says as clearly as he possibly can there were some things that were driving me crazy and I've fixed them

1:59:01

Jason Whitlock who knows a lot about all of this joins us next next to assess what we've just heard we'll be right

1:59:09

back my husband was serving on a deployment with the art um we got a phone call from Frank s burdened at that

1:59:15

list it's amazing what the stakes are when a very famous person decides to speak his mind very famous people can't

1:59:22

have free speech that's not allowed and Wes discovered that when he initially decided he kind of liked Donald Trump

1:59:29

watch I never actually told people that I like Trump when he was running because

1:59:38

I was bullied by Hollywood because I stayed in Hollywood and people like

1:59:44

think about your kids and I'm trying to hold on to the marriage so I'm just biting my my tongue like there's so many

1:59:51

fathers and mothers that go to work every day and they're in a situation

1:59:56

where they're biting their tongue because they think it would be better yes for their children that's right so

2:00:01

even me in my position I was biting my tongue on my political opinion because I

2:00:08

thought it would be better for my children got a lot more on that and what

2:00:13

it did to him as a man living through it tomorrow night but first our friend Jason Whitlock the host of Fear joins us

2:00:19

to assess we just saw Jason what did you think of that tuer I I thought a lot of things

2:00:26

and and forgive me for doing this but I'm going to unpack all of this on my show tomorrow find me at [youtube.com/](https://www.youtube.com/)

2:00:32

Jason willock but listen I that's a man wrestling with his faith in God and

2:00:40

wrestling with the fame that has makes him money and makes him rich and so throughout that interview tonight I

2:00:47

heard a guy that's a devout Christian and I heard a guy that is cursed with the disease of Fame it's undermined his

2:00:54

ability to be a good father it's undermined his ability to be a good husband it's undermined his happiness he

2:01:02

wants to be a Christian and the things he said about his faith and just wearing the lanyard with the ultrasound all of

2:01:09

that I love that about Kanye West I I I it scares the heck out of the left to

2:01:15

see someone like Kanye West that popular that influential his skin color that has

2:01:22

those Christian values because that's what's really under attack his Christian

2:01:27

values it scares them they don't want him to survive they they're using him

2:01:32

I'm going to make an analogy kente and Roose he they got him out on the tree and they're whipping him what's your

2:01:38

name and they want him to say leftwing liberal and he won't say it he keeps say I like Trump I like God I'm a Christian

2:01:46

and they keep whipping and slashing him and and they're trying trying to make this man bow down to the liberal

2:01:52

Orthodoxy and they're doing it as a message to me and everybody else if you don't get in line with what we want you

2:01:59

to think every black man every heterosexual black man every black man with Christian values we will beat you

2:02:05

into a pulp Kanye's man enough to stand up I wish more men were what does that

2:02:12

do to you to discover that you can be one of the richest most famous people in the world and you still don't have the

2:02:18

simple right to say what you really think what it does to Kanye is make him

2:02:24

realize the importance of God and his faith because that's the only protection you have again the guy use the words

2:02:31

that I believe some this is demonic everything the left preaches to black people you should be overweight you you

2:02:38

should uh kill your babies in the womb you you should uh Embrace a negative

2:02:44

culture that teaches you to kill each other and disrespect each other every it's a death culture it's a genocide

2:02:51

it's demonic just like Kanye West said I I I hope he wins his battle with Fame

2:02:58

because if he does he's a very important voice Tucker how can you say you respect

2:03:04

someone or a group of people if you don't allow them to reach their own conclusions about the world around them

2:03:10

if you respect a man you let him say his peace and you listen

2:03:15

respectfully it's clear as day the left doesn't respect black people we're being

2:03:22

used as Pawns in their demonic game that they're playing and and I know that

2:03:28

sounds hyperbolic but it's just factual it's a death culture it it's hostile

2:03:35

to Christian values you have to throw them all out in order to to serve their

2:03:42

political movement you have to be pro-abortion you have to believe in the

2:03:47

matriarchy and the dis ruption of the nuclear family if you're a person of

2:03:52

Faith black white whatever if you understand a Biblical worldview family

2:03:58

is at the heart of all of it and that's why Kanye is so devastated because his

2:04:03

family has been destroyed his wife is eating from the uh forbidden fruit of

2:04:11

feminism the matriarchy and the left's Demonic culture his family has been

2:04:17

destroyed any birth any person with just a Layman's understanding of faith of Christian faith

the family's at the

2:04:23

heart of the structure that's what God designed this man's family's been ripped apart

because his wife won't buy into

2:04:30

his vision she's been influenced by the clintons and the Democratic left these people have all been bought and paid for

2:04:37

this man is paying a heck of a price I'm I'm very proud of him so I go back and forth

sometimes on Kanye because again

2:04:45

he's struggling with Fame and he'll do some things that are inconsistent with his Christian values but overall is

2:04:51

Kanye trying to be a force for good absolutely yeah he is which counts Jason

2:04:58

Whitlock thank you for that great to see you thank you to Tucker Carlson tonight

2:05:04

so last night we showed you clips from an interview we did with yay previously known as Kanye West now last week he was

2:05:11

at the par Paris fashion week and unveiled a shirt that said White lives matter and of course much outrage ensued

2:05:17

and he was roundly announced as insane virtually no one asked him why he did that so we thought before dismissing him

2:05:25

as a mental patient it might be worth hearing his side of the story just listen to him so we came out to LA

2:05:31

booked a 30-minute interview with West which quickly morphed into a 2hour

2:05:36

interview and we're so grateful that it did because one of the most interesting deep and provocative conversations we've

2:05:43

ever watched everybody thought that guys operating the cameras thought that it really was fascinating whether you or

2:05:49

not so among many other things West gave us his assessment of Barack Obama whom

2:05:54

he knows well and has know well for many years even before he became president here's what he

2:06:00

said do you talk to Obama still I was Obama's favorite artist he actually met

2:06:05

with me Obama met with me and my mama to say that he was running for office back

2:06:11

in 2008 um and that he wanted the support and everybody was so into this idea of

2:06:19

the black president and we were always you were always cool

2:06:27

and it's also like you know how many how many of us

2:06:35

are there you know Obama level yay level you know Virgil

2:06:40

level um just black you know so brilliant that we cut

2:06:48

through all of the lines of racism like you just can't get rid of us not King

2:06:55

Cole level uh Dave Chappelle level

2:07:00

so in someplace we'd have to be friends and get along because it's like y you're at that level  
you're like

2:07:07

a you know Formula 1 Lewis Hamilton race car driver we're still driving a white

2:07:14

car but we're the best race car drivers uh uh that ever existed and that was

2:07:21

that was me and Obama's connection but soon as I wasn't saying the things that

2:07:27

I was supposed to say as a rapper uh our connection

2:07:33

faded she don't talk to him anymore I'll talk to him if I see him yep but I

2:07:39

guarantee you he see me I don't even know that I just thought that sound

2:07:47

cool one idea that was in my head about three minutes ago that I really want to

2:07:53

say it's a uh that's really interesting about the uh when a companies get the

2:08:00

BLM managers what's a BLM manager black lives ma black lives

2:08:08

matter uh office manager is basically get a semi

2:08:14

influential black person to become the face of a white company yeah right so

2:08:19

that means like in the design world in the art World they actually would

2:08:25

pick artists that were less talented than other artists based on their

2:08:31

influence uh not based on their actual work because everyone is vying for

2:08:38

influence and an and an opinion everyone is afraid of losing their opinion so

2:08:47

with Nike right Nike is as famous as you

2:08:53

say Nike's more famous than PayPal right yeah right what what number company you

2:08:59

think PayPal is I don't know number four overall overall you got well you

2:09:06

know what the number one is right it's Apple yeah I'm forgetting number two but number

three is uh

2:09:13

McDonald's then SpaceX is maybe six or s

2:09:19

it's really interesting that as lit as Elon is his previous company is actually

2:09:24

still worth more than uh than SpaceX so what number company do you think Nike

2:09:32

is the Nike number 321 it's not

2:09:39

there to be as big a financial company as it can

2:09:45

be it's there as an influence because black people love

2:09:51

Nike so Nike is like a company that is

2:09:57

redlining and Jerry mandering black people so the reason why Gap wanted me

2:10:05

to go the Gap it wasn't based on oh we need to get our stocks up you

2:10:11

know it's like these companies when they've been around for a long time gap's not like they're like we're in the

2:10:17

rag trade we're never going to be apple and everyone all these American

2:10:22

companies somehow took this this deal where they start putting in these really awkward weird number kind of CEOs like

2:10:30

Nike's got one um The Gap hat won it didn't work

2:10:36

out and there's all of these weird operators inside of

2:10:42

companies even in Balenciaga Pino the

2:10:49

and they um they're just there for control Steve Jobs talked about it it's

2:10:55

the most important thing you can have is control look at me all the money all the

2:11:01

influence and I have to act a complete ass to have any say so of anything that

2:11:08

my children are doing because that uh group of people have

2:11:15

control and say so over all the children inside of the clan

2:11:22

so that's what these companies are set up for that's the type of CEOs they're hiring especially when the founders are

2:11:28

out of there they kind of just give the companies up to a bunch of people and they're all in

2:11:34

cahoots like anyone that ever work with me they just look at oh who's yay

2:11:39

farming for talent that we can hire to be our new BLM office

2:11:47

manager like kind of like Obama what what do you you think you

2:11:52

think of Obama as a BLM office manager best one ever yeah best one ever

2:12:00

and you know I think Obama just like Virgil these people were

2:12:06

truly black to their core and truly brilliant to their

2:12:12

core but they went into situations thinking

2:12:19

that they could do it the white way as a black man and we saw what color Obama's hair

2:12:27

was when he went in and we saw what color it was when when he went out you know Virgil lost all his hair

2:12:33

you know and eventually passed away so when I have

2:12:39

techniques that are revolutionary if I raise my voice if I express myself on

2:12:46

Instagram it's a bonic and people can say oh that this

2:12:53

this what you're doing is toxic if if what I'm saying is

2:12:58

toxic I got to do everything to get it out of my body and

2:13:04

there'll be times where I see a level of like oppression perisian proper like

2:13:11

next level you know France owns 80% of African Banks level colonization

2:13:18

oppression and I'll be like I'm not going to let you guys kill me but one

2:13:25

thing that has to Really Happen say if Trump R ran

2:13:34

right we're not just going to be black influence we're going to be vision and

2:13:41

creativity we've got to rethink who we are as a species right now we're we're

2:13:47

we we practice killing ourselves every day like murder is legal in

2:13:53

America you know and abortion yes uh

2:14:00

so whoever gets the position needs to

2:14:07

listen to The Vision I didn't know it was going to rhyme when I first started they need to have

2:14:14

Elon they need to have me then you should start with those two and

2:14:20

then we'll get to the rest of them we could pull in a Johnny IES we'll pull in all of our living super brilliant people

2:14:27

and we need to analyze and and that just sell out for the cash

2:14:35

like these Fortune 500 companies is just selling out for the cash and put God first and the best representation of God

2:14:42

as the children the children is extension as family put the families first there's so many things suburbs

2:14:49

uh the train tracks being ripped up by GM just for capitalism all these ideas

2:14:55

that we have we we're now living in a place where we're the Orphans of capitalism and we just have to take a

2:15:01

pause and rethink how we can have the most

2:15:06

beautiful existence possible for our children for the kids and we're all kids

2:15:13

we're all God's kids we're all sons of Abraham so as we said this interview

2:15:19

went almost 2 hours and not a moment of it was boring at least from our perspective we can see if you agree

2:15:25

coming up [Music]

2:15:34

next story yay one of the first words to appear and in fact a word that appears in virtually every story is crazy or

2:15:40

mentally ill or bipolar struggling with mental illness etc etc the theme is always the same the guys a nut don't

2:15:47

listen to him and of course we're suspicious of that because through history in the Soviet Union for example

2:15:54

claims of mental illness were always a way to make dissident voices be quiet don't listen he's a lunatic and so we

2:16:02

asked yay directly about this about his very public struggles with manic

2:16:07

behavior but his hospitalization for exhaustion and he gave a remarkable answer and a believable one and he said

2:16:15

the life I was being forced to live live was driving me crazy I had achieved Fame

2:16:21

and Fortune and yet I was still not allowed to express what I really believe that diminished me and it drove me nuts

2:16:27

by the way my fa my marriage was falling apart and those two facts were interconnected listen to him described

2:16:34

the effect on him as a man not just on his mental health but on his dignity of being told he couldn't say what he

2:16:40

really thought it drove me crazy to not be able to say that I like Trump

2:16:49

it drove cuz think about it's me imagine me not being able to say what I wanted what was the point of being famous what

2:16:56

was the point of having you know millions of people love your music what was the point of having a voice if you

2:17:02

can't even use your own voice and connect it to your own opinions yes that's where the disconnect happened

2:17:08

that's where the quote um I think wrongly

2:17:13

uh uh wrongly diagnosed that's where the bipolar polarity is because you got

2:17:22

something you're thinking but you're told you're not allowed to say it in

2:17:28

public well I never actually told people that I

2:17:34

like Trump when he was running because I was bullied by Hollywood because I

2:17:43

stayed in Hollywood and people like think about your kids and I'm trying to hold on to the marriage so I'm just

2:17:49

biting my tongue like there's so many fathers and mothers that go to work

2:17:55

every day and they're in a situation where they're biting their tongue because they think it would be better

2:18:00

yes for their children that's right so even me in my position I was biting my tongue on my political opinion because I

2:18:08

thought it would be better for my children and now you look up and my kids are going to a school that teaches black

2:18:16

kids a complicated at K Quanza K Quanza doesn't you know so they don't teach

2:18:22

even Christmas itself Christ Mass they don't teach it at Sierra Canyon and what

2:18:27

they do is take all of the celebrities the actors the basketball players and

2:18:32

they throw them in this one school and they indoctrinate the kids so my son's

2:18:39

Psalm is brilliant so right now they're looking to figure out how to

2:18:45

indoctrinate him to make him be another part of the system I have a choir at my  
2:18:52  
school so uh right now we've come to a compromise but I'm not finished cuz I  
2:18:58  
don't compromise but we come to a compromise when my kids go to my school after school  
and they learn choir I sat  
2:19:06  
there with my son he came and he said why do I need to sing I don't even go to your school  
so imagine the 16-year-old  
2:19:13  
version of that guy the 26y old version of that guy where where the father  
2:19:18  
doesn't have say so of what the kids are watching what the kids are wearing what  
2:19:24  
the kids are eating who the kids are hanging out with Ray kwell said we have the information  
needed to have a human  
2:19:32  
Utopia but we're led by the least Noble most greedy  
2:19:38  
people there's a solution that can bring happiness to so  
2:19:44  
many more people I even had this idea about you know the connection of big Pharma to  
2:19:51  
Farms by having localized Farms with more localized  
2:19:56  
Farms you can use less pesticides if you have less pesticides then you have less  
2:20:06  
diseases and have big Pharma invest in the local  
2:20:11  
farms and they'll actually make more money I'm not one of the people that go  
2:20:16  
up and say Hey I want to stop anybody from making money the people that make  
2:20:22  
money and the powers that be I am your true Nikolai  
2:20:28  
Tesla and I'm not even a scientist what do you think of Elon Musk  
2:20:34  
do you know him very well what's your take on him you said  
2:20:40  
that because I said Tesla I did yeah the first thing that and and that everyone's always like oh  
elon's got these answers  
2:20:46  
I think he's a great I think he's a great team player you know like like I  
2:20:51  
said that about uh uh about Ray kwell in  
2:20:56  
Utopia you know in Rome they would bring all the most brilliant people and have them sit  
down to the point where their

2:21:02

seats had a toilet in them like people would not even get up to use the bathroom and they would ideate about

2:21:10

what Society needed and they'd invent new things and they put it all up on the wall and uh

2:21:17

before it was a school uh is a a design firm and what I

2:21:24

would do is pull together all my favorite thinkers and we'd invent that's

2:21:29

why I was happy that you saw two of the inventions right there you know because now it's like if I had said that before you drank the coffee um and some might

2:21:37

joke and say you're drinking the Kool-Aid but before you drank the coffee and before you saw the 3D printed uh

2:21:44

boot um zero waist 3D printed and boot uh if I said Nikolai Tesla you'd

2:21:51

probably uh you could have you could have smuggled that off I you

2:21:58

know I think it's I think it's insane for an Administration to not use a

2:22:06

talent like Elon Musk more like if I was in a uh or once I am I

2:22:14

will eventually be president before you know in my life time um but if I was in

2:22:21

the uh in office right now I would be meeting i' be calling Elon every day I'd

2:22:26

have him sleeping in the White House I'd say how do we use our platform as the most influential comp uh

2:22:34

that's a 4 in slip the most influential country in the world to show the rest of the world how

2:22:41

to live a simplified life but our country is under

2:22:48

attack and media and industries outside of our country are doing anything to

2:22:57

keep it as it was and everyone's just afraid God is love and I understand

2:23:03

I come off scary sometimes because I'm like I'm going to protect my kids I'm going to protect my reputation I'm going

2:23:10

to protect my brand and there's times when you have to pull the guns out you have to pull the swords out you have to

2:23:16

have righteous indignation as a Christian for everyone that ever said I can't get mad because I'm a Christian as

2:23:22

a Christian it's like yeah I don't understand how you can work and be so  
2:23:28  
successful and influential in the music business and the fashion industry the two most liberal  
businesses probably in  
2:23:34  
the world as a professing Christian with a pro-life badge on how does that work I  
2:23:40  
always think whenever I think whenever God allows a brilliant idea to Chen  
2:23:47  
through me and allows me to somehow you know take credit for it uh I was Snicker at the  
fact  
2:23:56  
that um with the Liberals their  
2:24:01  
main you know their main tool is you know that they use are  
2:24:08  
artist and influence influencers right but  
2:24:14  
then God has the number one artist and a number one influencer as a conservative  
2:24:19  
so I always chuckle at that every time I come up with some brilliant I was like could you  
imagine if you know they could  
2:24:25  
have just indoctrinated yay you know the world could have just uh totally  
2:24:31  
been uh ran into the hole uh and there's times  
2:24:38  
there's battles that the devil had won but the devil's a defeated foe like for me to have gone  
from Jesus walks to  
2:24:45  
you're such a hoe I love it you know that's that deviation from the path so I  
2:24:53  
I mean I love that question cuz I really every time I just it just it just tickles me you know like  
that the very  
2:24:59  
thing that liberals use the most of they don't have the best person at  
2:25:04  
it h i mean do you talk to other people in your business you know who are  
2:25:10  
successful in the music industry the fashion business um who secretly agree  
2:25:16  
with you yeah there's a lot of I mean there's a lot of fashion people I mean Tommy  
2:25:22  
hillfigure love Trump uh let me see who are I got to think of all the other uh  
2:25:29  
Trump I'm not even going to use the term Trump supporter right because that's why  
2:25:34  
don't people say uh Hillary supporter or Biden supporter this is just you

2:25:41

know um yeah there's a lot of people you know what you know uh people in my

2:25:47

business who love Trump businessmen people who love money yeah

2:25:54

you know people love money people who actually like being successful and you know and that ran into the ground like

2:26:00

those are some of the [Music] people ask West any question about

2:26:06

virtually anything in the conversation moves back to his faith in God which is clearly foundational and is driving his

2:26:13

transformation from a pop star to what he hopes to become is a spiritual leader

2:26:18

he explained it in this clip what's your prayer life

2:26:24

like do you pray a lot this is a prayer we're in constant

2:26:31

prayer I thought Hil Mary came to me uh not in a Catholic way but more like in a

2:26:36

Tupac way like come with me Hil Mary I'm going to run quick see what do we have

2:26:42

here now do you want to ride or die n n na na na have you ever heard that yeah

2:26:49

it's like a Negro spiritual it's a chant it is you know it it put you in that

2:26:56

mode I got a song that I made it was like a mix it was a hybrid of that and L

2:27:03

Zeppelin and it went it goes it's like my best song La La La La wait till I get

2:27:11

my money right la la la la then you

2:27:16

can't tell tell me nothing right and people I mean I can open up this stuff I

2:27:22

can open up this I can open up tours with this song I I wanted to point out this hybrid you know it's like if you

2:27:29

see zombie one uh Zombie Land one and Zombie Land 2 or Terminators anything

2:27:35

they always make the the characters a little bit batter in the next Generations Next Generation Next

2:27:41

Generation so that's you know Kim is like ah hybrid

2:27:47

She's Not Just Marilyn Maro you know she's also um she's also a fashion person

2:27:56

she's also a mom she's also an activist

2:28:01  
she's a lawyer she's a multi-billionaire you she's hot she's one of the most  
2:28:06  
beautiful people of all time you know this is a different  
2:28:12  
level of uh video game character now and when you see a headline that says  
2:28:19  
Kim says oh I'm going to stay single forever that's the  
2:28:25  
indoctrination like because they want this person to tell all the little girls  
2:28:33  
out there that they need to be single forever you know all moms I know there's  
2:28:39  
definitely people who watch do you think that so you don't think that's a organic natural thing  
I mean that is a message  
2:28:45  
that she is being used to send absolutely think about the song don't talk about Bruno no no  
no which already  
2:28:50  
sounds weird like it's you know talking about like a uncle or something that did something  
wrong if they say don't talk  
2:28:56  
about Bruno right but uh in the song listen to the lyrics it says the man of  
2:29:01  
my dreams will be slightly out my reach and I just see my kids running around  
2:29:08  
and I see these things but you know the thing about for you know hey got for the  
2:29:14  
execs at Disney that are studying everything I'm doing saying trying to figure out how to  
connect with 15year olds and that's why Bernard Arno you  
2:29:21  
know buys Supreme and instead of putting a true a true skater designer they put  
2:29:28  
like a BLM manager as the head of supreme because Supreme has an impact  
2:29:34  
with the 15 year olds uh  
2:29:39  
for uh the Disney guys you know you might not believe in God but God  
2:29:44  
believes in you it's not not a battle you can win it's like don't jump Anakin  
2:29:50  
I have the higher ground kind of situation so you could put out all of the  
2:29:57  
indoctrinations and you know moves and have the biggest media company but  
2:30:04  
why am I alive why am I protected why did I  
2:30:10  
become the richest black man of all time like how did that happen and the more

2:30:17

and more I lean into God and work for God the more winds God is going to

2:30:23

bestow on our team on Jesus gang and for

2:30:28

me to go out and just State an obvious an empathetic statement in the middle of

2:30:36

the most liberal Central like to go that was like ten and square or something right like with Candace Owens and we

2:30:45

both wore the shirt at the same time you know we got some

2:30:50

Jesus soldiers out here and people say they're willing to die for it but we

2:30:56

live for it we're living for the battle and what's the battle for life itself

2:31:02

our children they're killing us through the food they're killing us through the

2:31:08

content they're killing us through the programming but God is alive and is's

2:31:14

alive in all of us and we will over come it sounds like you're hopeful for the future of the

2:31:20

country absolutely because I have the vision for it I I I understand the

2:31:26

ecosystem I understand how to even liberate a big farma I have

2:31:33

solutions for the future you know I don't have the entire Vision you know certain things are just

2:31:41

in front of me and they happen when they're supposed to happen but there's so many open doors like

2:31:47

[Applause] we have this concept I was been this is put on my heart the idea of a monastery

2:31:54

or I call it the dondy which takes the different disciplines and blends them together and

2:32:02

in the dondy we have proper baby Health Care like and

2:32:10

there I'm sure there's a hired like actually when I met with Gabby she had a really really good term for this

2:32:18

and um so many uh people bring their babies

2:32:24

to the hospital not just black people and the doctors mess up and they're like

2:32:30

oh there's been some complications so to be able to have like

2:32:36

incredible nurses I was very specific about saying nurses instead of saying doctor to uh I

2:32:45

don't I don't believe you need a doctor and I'm not a doctor but a

2:32:53

nurse uh it's possible you know to have

2:32:58

uh a successful uh child birth and so that's the first thing we

2:33:04

provide shelter we won't turn anyone away food clothing high-end curriculum

2:33:11

and Vocational curriculum uh farming carpet

2:33:16

Automotive computer software and Hardware so it becomes a new place where

2:33:22

you someone can lay the baby on their steps and say hey the situation I'm in I

2:33:29

don't have enough money for another kid I don't have the time I don't have the

2:33:35

room in my house I just don't have the resources and every day for the past two months

2:33:43

I've been walking by this Planned Parenthood and I'm thinking about stopping in because I just can't have

2:33:48

this baby and what I'm doing is saying hey well let's put a place just across

2:33:54

the street from the Planned Parenthood and say this is a place that if you when

2:34:03

you decide to have your child this child can have the best

2:34:08

opportunity at life do you think the society discourages parental involvement

2:34:14

parental influence over the children um I mean Society is like a big term you

2:34:21

mean it is well you had said that your father was discouraged from you know

2:34:26

being in your household and you have been discouraged from being in your children's lives yeah do you think this

2:34:32

is a thing that happens to a lot of people in America to a lot of men absolutely and a lot of men deal

2:34:41

with a mother and the the um the baby

2:34:48

mama and the Mother-in-law ganging up to take the child away yeah and not wanting to give

2:34:55

the dad the the dad uh his his say so like there was even a moment where we

2:35:01

were arguing about North's uh basketball coach and I had to say

2:35:10

like I went from that making a basketball team in eighth grade to in

2:35:16

championships in ninth grade by practicing every day and North Flex could basketball and I'm going to come

2:35:22

and practice with her every day I'm also going to pick the other coaches that work with her and now that she's

2:35:30

back uh playing basketball this is the most confident person in the league she's like the Dennis

2:35:36

robman uh and when nor snatches the ball out of a of a girl twice her size and

2:35:44

she comes over to the side I tell her don't let anyone take anything from you ever don't

2:35:50

let anyone take anything from our family don't let anyone take our company always

2:35:55

protect your brothers and sisters more for the interview coming up
